STATEMENT OF SIGNIFICANCE:

N.O. Anderson made several places for storage in August 1921, and in 1921-22 made the base for the 1922-23 expedition. The base was located on the old channel of the river, some 20' from the shore. In the debris logs (up to 2 ft. in height) and under the debris were many logs which were cut and hauled for the purpose of building a house. Some of the logs were cut during the construction of the project but for lack of funds were not hauled. The debris logs were cut during the construction of the project but for lack of funds were not hauled.
