

### City/Borough of Juneau - Salmon Creek Reservoir

PWS ID# 110342.001, IN001

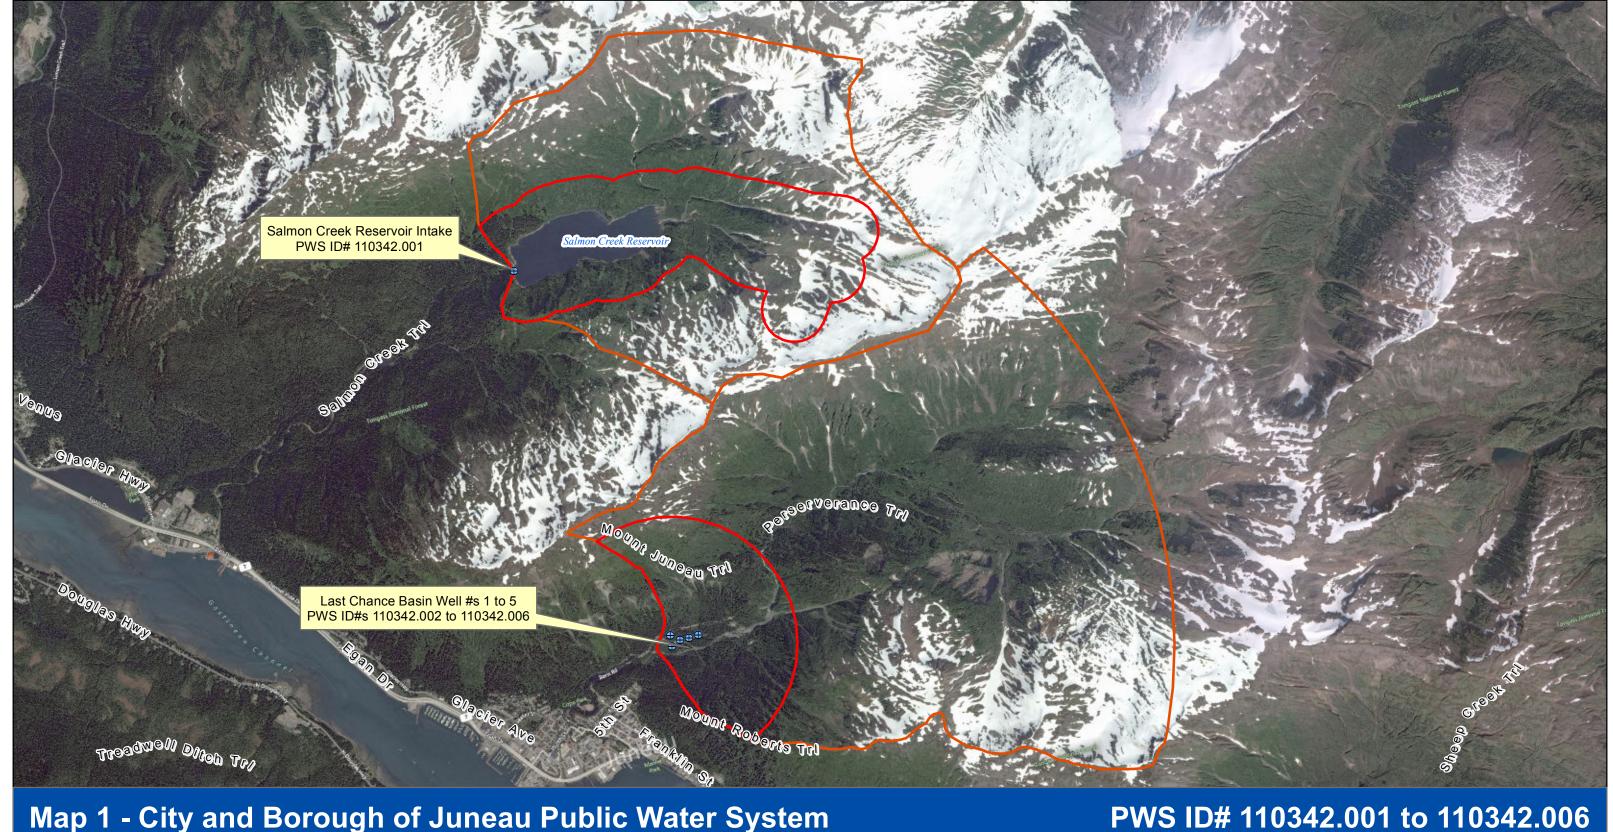

<u>Table 1: Public Water System Source Information</u>						
PWS Name	City/Borough of Juneau					
PWS ID Number	110342.001					
State Asgn ID No.	IN001					
Facility Name	IN Salmon Creek Reservoir					
Source Type	Surface Water					
Federal Classification	Community					

#### **Executive Summary**

The public water system for the City/Borough of Juneau is a Community Water System (CWS) consisting of five wells located in the Last Chance Basin near Gold Creek and one intake on Salmon Creek Reservoir. The primary source is the Last Chance Basin Wellfield on Gold Creek and the secondary source is the Salmon Creek Reservoir. This Executive Summary is for the Salmon Creek Reservoir.

The Salmon Creek Reservoir protection area is approximately 4.5 square miles in size and received a susceptibility rating of **Very High**. *A rating of High to Very High is typical for all systems with surface water intakes*. Identified potential and existing sources of contamination for the Salmon Creek Reservoir include landslides, wildlife, an abandoned cabin and foot trails. These are considered potential sources of bacteria and viruses, nitrates and/or nitrites, volatile organic chemicals (VOCs), heavy metals, cyanide, and other inorganic chemicals, synthetic organic chemicals (SOCs), and other organic chemicals (OOCs).

Combining the natural susceptibility of the surface water source with the six (6) contaminant risk categories, the public water system for City/Borough of Juneau – Salmon Creek Reservoir received an overall vulnerability rating of **Medium** for bacteria and viruses, nitrites and/or nitrates, VOCs, heavy metals, cyanide, and other inorganic chemicals, and SOCs and OOCs.
