BEFORE THE HONORABLE KARL JOHNSTONE  
Superior Court Judge

Anchorage, Alaska  
December 13, 1989  
8:45 a.m.

APPEARANCES:

For Plaintiff:

DISTRICT ATTORNEY'S OFFICE  
ROBERT LINTON, ESQ.  
BRENT COLE, ESQ.  
SAMUEL D. ADAMS, ESQ.  
1031 West 4th Avenue, Suite 520  
Anchorage, AK 99501

For Defendant:

RICHARD FRIEDMAN, ESQ.  
1215 West 8th Avenue  
Anchorage, AK 99501

DICK L. MADSON, ESQ.  
712 8th Avenue  
Fairbanks, AK 99701

1 PROCEEDINGS

2 DECEMBER 13, 1989

3 (Tape: C-3528)

4 (1808)

5 THE CLERK: ...presiding, is now in session.

6 THE COURT: Be seated. Are we ready to  
7 proceed to the next motion or is there something else  
8 we need to take up now with the other motions?

9 MR. MADSON: Your Honor, before we argue the  
10 next motion, while we were still discussing the motion  
11 we had yesterday, the motion to suppress, there's some  
12 material I'd like to have marked and filed, for the  
13 record, if I could, please?

14 Two items. One, we are not going to present  
15 Captain Hazelwood; he will not be testifying. But, in  
16 lieu of that, Your Honor, I know what the court said  
17 yesterday, but for the record, I still have an  
18 affidavit to present, and I'd like to have made part of  
19 the record.

20 THE CLERK: That would be Defendant's  
21 Exhibit S.

22 THE COURT: May I see it, please? (Pause)  
23 Mr. Linton was conducting the state's portion of the  
24 motion yesterday and I'm not sure what the position of  
25 the state is, if they still want to maintain some

1 distance, pending a petition for review of this court's  
2 review decision on the immunity issue between  
3 Mr. Linton and trial counsel, who are in court today,  
4 Mr. Cole and Mr. Adams.

5 I have no objection to calling Mr. Linton up,  
6 have him come up and review these documents, rather  
7 than having trial counsel up here. I take it you don't  
8 have a copy of them yet?

9 MR. COLE: I don't have a copy.

10 MR. MADSON: Your Honor, because of that issue  
11 the court just raised, I did not furnish a copy. I  
12 didn't know if that was the case. In talking to  
13 Mr. Linton yesterday, I believe the court's suggestion  
14 is correct. I think that's at least the plan I was  
15 told, that he is still going to maintain his initial  
16 approach to this case. So I did not give Mr. Cole a  
17 copy of this. I did give him, however, a copy of a  
18 case, and I do have some others I'd like to cite to the  
19 court.

20 THE COURT: Why don't we wait until we get  
21 Mr. Linton over here before we go any further on this  
22 issue. I don't know what Exhibit T is, but it sounds  
23 like it's something that has to do with a sensitive  
24 matter, and I think we'd better just get Mr. Linton  
25 here.

1                   Why don't we go off the record a moment?

2                   MR. COLE: I'll call him, if you like.

3                   THE COURT: We can call him right here. Yes,  
4 we'll go off the record.

5                   (Off record - 8:50 a.m.)

6                   (On record - 8:55 a.m.)

7                   THE COURT: Yes, while we were off record,  
8 Mr. Purden called Mr. Linton. It took a few minutes to  
9 get a hold of him and Mr. Linton indicated he'd be  
10 right over, so we'll just stay here on the record and  
11 wait for him.

12                   MR. MADSON: I owe an apology, Your Honor. He  
13 was here initially and I told him we were not calling  
14 Captain Hazelwood, so he left. He felt -- obviously,  
15 he felt he was free to leave.

16                   THE COURT: No harm. (Pause) Mr. Linton has  
17 just arrived. Mr. Cole and Mr. Adams, if you want to  
18 step outside?

19                   (Pause)

20                   Mr. Linton, defendant has marked for  
21 identification Exhibits S and T, which I have before  
22 me. If you want to come up here and take a look at  
23 them?

24                   MR. LINTON: Yes, sir.

25                   THE COURT: They refer to yesterday's motion.

1 I'm not sure what Exhibit T refers to. You'll have to  
2 clear us up on that.

3 MR. MADSON: The same thing, Your Honor. Now  
4 that Mr. Linton's here, I will. I didn't want to  
5 discuss it, of course, in his absence.

6 THE COURT: It's an affidavit of  
7 Captain Hazelwood, referring to his alleged knowledge  
8 of the agency's bulletin and other information  
9 pertaining to pilotage.

10 And what is Exhibit T? It looks like it's a  
11 transcript from Delozier?

12 MR. MADSON: Yes, Your Honor. That's a  
13 transcript -- part of a transcript, the testimony of  
14 Mark Delozier at the NTSB hearing. The reason I ask  
15 this be marked is to show the cooperation in the way  
16 the state officer was involved in the obtaining of the  
17 blood sample from the Coast Guard. It showed what he  
18 was doing. I can get to that in a moment.

19 If I can cite another case here to show state  
20 involvement along with federal officers in the  
21 obtaining or unlawful search, as I categorize it, but  
22 obtaining of the search -- of the blood sample, to show  
23 that the state was intimately involved in this. I  
24 think that illustrates it, along with Mr. Weeks, when  
25 he testified. Also, he mentioned the degree of state

1 and federal cooperation in this case.

2 And I wonder -- something that's already in  
3 the record, and that is the transcript of the search  
4 warrant that also bears on this question. And I don't  
5 know what number that was marked, Your Honor. It's the  
6 search warrant 3BA S89-7, April 1, and page nine also  
7 bears on this same issue, where, I think, Trooper Fox  
8 testified that they determined the best way to go with  
9 the blood sample was to use the Coast Guard authority.  
10 In other words, the state was intimately involved in  
11 that decision.

12 THE COURT: Mr. Madson, I'm sure that you were  
13 aware of evidence rule 104-D before you submitted the  
14 affidavit.

15 MR. MADSON: I can't quote it verbatim, Your  
16 Honor, but...

17 THE COURT: Yes, that answers your question,  
18 to some extent, that you raised yesterday.

19 MR. LINTON: Judge, I have no objection to  
20 Exhibit T.

21 THE COURT: Okay. Exhibit T is admitted.

22 DEFENDANT'S EXHIBIT T ADMITTED

23 MR. LINTON: I object to Exhibit S, for all  
24 the reasons we stated. I understood that we resolved  
25 it yesterday; that an affidavit would not be acceptable

1 and that the Captain would have to submit himself to  
2 cross examination if he wanted to do this. And when I  
3 came in this morning, before Your Honor came on the  
4 bench, I was told that he would not be taking the  
5 stand, and I took that as a statement that there was  
6 nothing else to be done. And so I left, and I  
7 apologize if I disrupted the court.

8 THE COURT: Nobody disrupted the court. I was  
9 not aware there was going to be an affidavit filed.

10 MR. LINTON: And I make the same objection as  
11 so stated.

12 MR. MADSON: Your Honor, I agree with  
13 Mr. Linton 100%. I know what the court said yesterday  
14 and I indicated to you this morning, I said I wanted it  
15 filed for the record and that was all. So, I...

16 THE COURT: Okay. I just wanted to make sure  
17 there is still going to be an objection and have  
18 Mr. Linton here to represent the state.

19 All right. The affidavit will not be used in  
20 consideration for the motion. The facts, as stated,  
21 will not be considered as facts, using just the  
22 affidavit as a basis for those facts. I'll accept it  
23 as part of the record for future purposes, but I will  
24 not be using that affidavit in making my decision.

25 MR. MADSON: That's fine. Your Honor, while

1 Mr. Linton is here, it would save me some trouble,  
2 instead of copying -- there's about three cases. I  
3 could just cite those cases to both the court and  
4 Mr. Linton, and I think it would just be easier.

5 The Court, yesterday, indicated that  
6 additional case law or additional authority up to 4:30  
7 today would be accepted and I could just cite these  
8 cases, just a couple of them. In addition, the one I  
9 think Mr. Linton has a copy of the one I've already  
10 furnished the court, State vs. Williams. But State vs.  
11 Jones is, I think, appropriate, 706 PS 317.

12 THE COURT: Is that an Alaska case?

13 MR. MADSON: That's an Alaska case, yes.  
14 United States vs. Chevis Vernaza, V-e-r-n-a-z-a,  
15 that's 844 FS 1368. That's a Ninth Circuit case, a  
16 recent Ninth Circuit case. It stands for the  
17 proposition that federal courts will use -- will  
18 utilize the federal rules of evidence, and also if it's  
19 admissible under federal law, they will allow it, even  
20 though it's solely state officers who are involved and  
21 it's illegal under state law. Then in their Alaska  
22 case, State vs. Schraff, S-c-h-r-a-f-f, 544 PS 834, and  
23 that's all.

24 (Side conversation)

25 THE COURT: Thank you.

1 MR. MADSON: Thank you.

2 THE COURT: Before you leave, your motion to  
3 dismiss the indictment for failure to provide  
4 exculpatory evidence is denied.

5 I've made a determination that the evidence  
6 that you claim to be exculpatory is not substantially  
7 favorable to the defendant, that any inferences I would  
8 draw, that Captain Hazelwood would know some of that  
9 information, comes both ways, and I infer that he would  
10 know the agency bulletin, I infer that he would know  
11 all requirements. I think there is some doctrine that  
12 a person is, to some extent, deemed to be aware of the  
13 law, and my interpretation of it would cut both ways.  
14 It could be inculpatory as well as -- maybe to some  
15 slight extent, exculpatory.

16 First mate Cousins' statements, in my opinion,  
17 were not substantially favorable to the defendant.  
18 They could have been inferred to be slightly  
19 inculpatory as well, giving the defendant knowledge and  
20 inferring to the defendant that he should have known  
21 that first mate Cousins was not qualified, would make  
22 it somewhat inculpatory.

23 So definitely it's not potentially favorable  
24 to the defendant. So your motion to dismiss on those  
25 grounds is denied.

1           The others, I haven't finalized yet. We're  
2 still working on them. I will advise counsel of that  
3 in writing.

4           You are excused. You can call Mr. Cole back  
5 in.

6           (Pause)

7           (2769)

8           MR. LINTON: Your Honor, Mr. Cole stepped away  
9 for a moment. I think he will be right back.

10          (Pause)

11          THE COURT: Are you ready to proceed now,  
12 Mr. Cole?

13          MR. COLE: Yes.

14          MR. MADSON: Well, Your Honor, the state may  
15 have scored on their point, but I'm still in the game,  
16 and we'll start, I guess, in a rather haphazard manner,  
17 since my proposed schedule got off-track yesterday, and  
18 I guess I'll just randomly pick something, but maybe  
19 save the main one for dessert.

20          Some of these arguments, Your Honor, I am not  
21 going to orally argue some of the motions. I think  
22 they've been adequately briefed and would just be  
23 unnecessarily time-consuming to do them, but some of  
24 them, I think, a few words are necessary.

25          THE COURT: Can you tell me which ones you are

1 not going to argue?

2 MR. MADSON: I'm going to argue very little on  
3 failure to approve the element of property of another.

4 THE COURT: Which ones are you not going to  
5 argue?

6 MR. MADSON: Okay. Not going to, Exhibit "G",  
7 denying the right to a fair and impartial grand jury.  
8 There is probably no point in arguing number four on  
9 the second page there, motion to dismiss the DWI,  
10 because that is going to hinge on the suppression  
11 issue. So there is nothing to be said on that.

12 The same is true of number five, the  
13 information, reckless endangerment, because that's  
14 going to hinge on...

15 THE COURT: I'm having a hard time following  
16 which one. I've got a proposed schedule for argument  
17 at Omnibus Hearing, and I don't have a "G" on it.

18 MR. MADSON: You've got the first one then,  
19 Your Honor. There's, unfortunately, a second one.

20 THE COURT: Well, I don't have it.

21 MR. MADSON: I don't have an extra copy.

22 THE COURT: Did you file it?

23 MR. MADSON: Mr. Friedman was supposed to have  
24 filed it, Your Honor.

25 MR. FRIEDMAN: That's right.

1 MR. MADSON: Maybe he used the first one, too.  
2 That would be our error, if he did. We had an initial  
3 one, then it was changed.

4 THE COURT: I just don't have it. So let's  
5 take it by title and maybe we can -- which one are you  
6 not going to argue now?

7 MR. MADSON: Defendant was denied his right to  
8 a fair and impartial grand jury, will not be argued.

9 THE COURT: Now, I have one, it says C-1,  
10 pre-trial publicities and matters relating to grand  
11 jurors. Is that the same one?

12 MR. MADSON: That's the same one.

13 THE COURT: Okay. Different title, same one.  
14 I'll check that one off here.

15 MR. MADSON: Then motion to dismiss the DWI  
16 charge, count one. I don't know if that's listed  
17 separately there or not.

18 THE COURT: Okay. I have that. That's the  
19 motion to dismiss complaint, number two, DWI.

20 MR. MADSON: And that also would encompass  
21 count two, that's reckless endangerment.

22 THE COURT: Okay.

23 MR. MADSON: These, obviously, hinge on  
24 something else. So, it would be just redundant.

25 THE COURT: No oral argument on that either?

1 MR. MADSON: Right. And the motion to compel  
2 discovery and depose witnesses, I don't believe is  
3 necessary either. I think after that was filed, we did  
4 receive some additional discovery that answers our  
5 questions and we seem to be getting discovery on a...

6 THE COURT: So that's withdrawn at this time?

7 MR. MADSON: Yes, that's withdrawn.

8 THE COURT: Okay.

9 MR. MADSON: The others, I don't -- I believe  
10 if I argue some of them, it would be very, very little.  
11 So I don't want to say I won't, 'cause I might just  
12 have a few words to say.

13 THE COURT: Okay. Thanks.

14 MR. MADSON: I'd like to start with whether or  
15 not widely dangerous means includes crude oil. That's  
16 one of the motions which hinge on, of course, the  
17 indictment, which we believe, if our position is  
18 correct, the indictment should be dismissed.

19 Your Honor, this one is another very uncharted  
20 area that the legislature did not exactly give the  
21 court or counsel a road map as far as leading us to a  
22 clear and concise result. It's somewhat unfortunate  
23 that they didn't make it more clear, but on the other  
24 hand, I think they did give us a few clues as to what  
25 they meant. And that, obviously, is what this is all

1 about.

2 Talking about what did the Alaska Legislature  
3 intend when they came up with this definition of widely  
4 dangerous means. And, I think, to begin this analysis  
5 we have to go back again to look at the entire statute,  
6 not just this definition. And when it was passed,  
7 there's, I think, sub-part (A), paragraph A, which  
8 specifically deals with oil, and that's the portion of  
9 the statute that makes it unlawful to tamper with an  
10 oil facility, which arguably might, if not a tanker, at  
11 least the storage facility, the pipeline and everything  
12 else that's kind of ancillary to the tanker.

13 Now, the legislature in doing this, obviously,  
14 thought about oil. They considered oil and the effects  
15 of what would happen if somebody tampered with an oil  
16 facility, and primarily the pipeline, I would submit,  
17 since they were obviously quite concerned about this,  
18 and rightfully so. And in doing that, they were  
19 concerned about what would be the effects in the  
20 environment if somebody out there decided to put a bomb  
21 under the pipeline or do something that would obviously  
22 cause an oil spill.

23 Then the question is, when they came down to  
24 be, did they -- were they still thinking about crude  
25 oil? Were they thinking about oil at all when they

1 came down to the statute that's involved here, which is  
2 the criminal statute that says it's unlawful to act  
3 recklessly, to recklessly create a risk that you are  
4 going to spill crude oil? How you are going to do this  
5 by widely dangerous means? Okay.

6 So that leads us to the next thing is what's  
7 widely dangerous means? Does that include this  
8 substance, crude oil, that they were talking about in  
9 the first paragraph? I think the common sense approach  
10 to this would be they weren't, because it would have  
11 been logical, very logical, when they're dealing with  
12 the same identical statute and they're talking about  
13 oil and part of it. Why not very simply put oil in in  
14 the definition? And to my knowledge, no state has done  
15 that.

16 Now, the state in their argument has pointed  
17 to two states, Pennsylvania and Hawaii, neither of  
18 which have an identical definition section that the  
19 state of Alaska does. And so I think the analogy with  
20 those two states is certainly not appropriate. This is  
21 one where there is no real law on this subject.  
22 Nowhere can one find that a court has found crude oil  
23 to be widely dangerous means under a definition which  
24 is the same as or very similar to the one that the  
25 Alaska Legislature used when they passed this act.

1           It would then seem that if it is not clearly  
2 the legislative intent, I suppose the clearest  
3 legislative intent would be they'd have crude oil in  
4 here, and we wouldn't be arguing that, but they didn't  
5 do that. Now we're saying did they or didn't they  
6 intend to do this? It, again, would have been very  
7 simple to do it if they were considering oil, and they  
8 certainly were when they passed this.

9           Now, in addition, it's different from the  
10 model penal code. They made a substantial change. One  
11 of the things the legislature did is require that the  
12 substance or force be difficult to confine. This  
13 raises an ambiguity right here as to whether crude oil  
14 by itself is difficult to confine. Certainly a gallon  
15 isn't, 10 gallons, 55 gallons. Maybe when you get up  
16 to the size of the Exxon Valdez somebody can say, yeah,  
17 that's difficult to confine because it's so big. But  
18 is it? You've got seven-eighths of an inch of steel  
19 surrounding a large quantity of oil.

20           If you look at it in that perspective, that  
21 skin is extremely thin. It's like a baggy and nothing  
22 else. A very, very thin, almost skin around this  
23 quantity of oil. I don't think you could say it's  
24 difficult to confine. It's simple to confine, quite  
25 easy. The problem is, what happens when it's suddenly

1 lets loose. But it's not, I would submit, difficult to  
2 confine.

3 Then the legislature says if it's difficult to  
4 confine and it's capable of causing this damage,  
5 including -- and here's again what is important: When  
6 they say including fire, explosion, avalanche, poison,  
7 radioactive material, bacteria, collapse of a building  
8 or what, they didn't say, "or similar type things."

9 This gets into the -- kind of the, I guess, specialized  
10 area of statutory construction and, unfortunately, when  
11 you step into that quagmire, it can lead you sometimes  
12 to safe, high ground, and other times you find yourself  
13 sinking rapidly.

14 As another judge once told me, the problem  
15 with statutory construction is you can basically find a  
16 rule to come out the way you want it to be. You can  
17 find some rule someplace that's going to say, yeah,  
18 that's exactly what I mean, and that's what the  
19 legislature did.

20 However, I found a rule, and I cited that in  
21 the brief and it leads us to where I think we should  
22 go, which is because the legislature defined these  
23 terms explicitly by implication, they intended to  
24 exclude others. Now, maybe that sounds overly  
25 technical but it is a well known and recognized form of

1 statutory construction, because the legislature didn't  
2 say "other similar type catastrophes," or they didn't  
3 use the word, "catastrophe." They did say, "here is  
4 what we mean," and they listed these items. Sutherland  
5 and others say "when they do that, you can certainly  
6 infer or imply that the legislature intended to exclude  
7 everything else." And crude oil isn't going to fall in  
8 these categories.

9 So, the other things I want to mention, again,  
10 Your Honor, is, I guess, the closest thing that might  
11 come to it, and I would submit it really doesn't;  
12 that's the Pennsylvania case the state cited in their  
13 opposition, which I believe is Commonwealth vs. Scatina  
14 (ph). That's the case where the gentleman in  
15 Pennsylvania decided to make a fast buck by allowing  
16 people to pour toxic waste down his bore hole into what  
17 he thought was an abandoned mine and the material  
18 would remain there forever and he'd become a wealthy  
19 man and nobody would know the difference.

20 Unfortunately, it leaked, and when it leaked, it spread  
21 this sheen of material on the river in Pennsylvania.  
22 It spread for a long distance. But the material there  
23 wasn't crude oil, and I think that's important.

24 That case did not hold that crude oil -- there  
25 was a risk of catastrophe by the use of crude oil. We

1 don't even know from that opinion whether crude oil was  
2 there or not. It was probably waste oil from  
3 industrial products and crank cases of automobiles and  
4 things like this, in addition to a lot of other toxic  
5 material.

6 But the court there wasn't really dealing with  
7 the question of whether this was -- this came within  
8 their definition. The only thing they were concerned  
9 with was whether or not the evidence was sufficient to  
10 show that this risked a catastrophe. I guess where  
11 that puts us then is right back to square one.

12 The Hawaii statute doesn't help. It's  
13 certainly different. They use a term "other means of  
14 causing potentially widespread injury and damage."  
15 That's a pretty wide open, broad definition in contrast  
16 to Alaska, which defined it much more narrowly.

17 So, if you eliminate Hawaii and you eliminate  
18 Pennsylvania, it leads us right back to where we  
19 started from, which is the court has to come up with an  
20 answer. Again, there is no clear guidance here, and I  
21 would submit that unless the court finds that if,  
22 number one, crude oil is difficult to confine, which  
23 there is, I think, a substantial body of knowledge to  
24 the contrary, and, secondly, that it was the  
25 legislature intended it to come within the very

1 specified means of causing widespread damage such as  
2 fire, explosion, et cetera, et cetera. So, I would  
3 submit that on that ground, Your Honor, the indictment  
4 should be dismissed.

5 Thank you, Your Honor.

6 (3540)

7 MR. ADAMS: Mr. Madson said something that is  
8 correct. When you start getting in the statutory  
9 construction, you start dealing with quagmire. While  
10 the number one rule about statutory construction is you  
11 don't do it where you don't need to, and that's cited  
12 in Horowitz vs. Alaska Bar Association, if the meaning  
13 of a statute is plain, it should be enforced as it  
14 reads, without judicial modification or construction.

15 Because we're not dealing with fire,  
16 explosion, avalanche, poison, radioactive material,  
17 bacteria, collapse of building or flood, a widely  
18 dangerous means can be summarized as any difficult,  
19 confined substance, force or other means capable of  
20 causing widespread damage, and that's it.

21 We have 11 million gallons of oil; 250,000  
22 barrels of oil leaked out of this vessel. If it was  
23 easily confined, if it was not just difficult to  
24 confine, then, I believe, on March 28th [sic], the  
25 morning after, there would have been booms around that

1 vessel and we wouldn't have the widespread devastation  
2 in Prince William Sound. So, there is absolutely no  
3 reason to go to judicial construction to find out what  
4 the meaning of this is; it's plain. In 1989 there are  
5 innumerable substances that can cause widespread  
6 devastation, and the state decided not to make a  
7 grocery list.

8 Now, with respect to statutory construction,  
9 if the court does feel the need to interpret the  
10 statute with extrinsic aides, then the most important  
11 one is the model penal code and other statutes similar  
12 to the model penal code. Now, Alaska passed this  
13 statute back during when the penal code was modified, I  
14 believe, back in the late '70s, and in the tentative  
15 draft -- the language of the tentative draft, the  
16 comments by the individuals who drafted the statute,  
17 they specifically said it was based on the model penal  
18 code. From that information I went to a number of  
19 different statutes that were based on the model penal  
20 code, including the Hawaii statute and information we  
21 have, by the Department of Law officials that were  
22 involved in drafting this, the Hawaii statute was  
23 followed quite closely when the Alaska Legislature  
24 passed their statute.

25 The Hawaii Legislature says the gravamen of

1 this offense, risking catastrophe, is the potential to  
2 cause widespread devastation. That's exactly what the  
3 Pennsylvania Supreme Court says. It's the potential to  
4 cause widespread devastation that leads us to -- it's  
5 the end-all. In one case the court held that a person  
6 in a paint factory who dropped a match into a  
7 five-gallon drum of acetone, I believe, risked a  
8 catastrophe, and the model penal code definition and  
9 the Hawaii Legislative decision, the Hawaii statutory  
10 definition, is quite close.

11 The only difference between the Hawaii  
12 definition and the Alaska definition, I believe, is  
13 that under Alaska's definition, it has to be difficult  
14 to confine. While crude oil in a vessel is not  
15 difficult to confine, when it becomes spilled, it is  
16 difficult to confine. It depends on where the thing is  
17 packaged.

18 When oil was in the ground, it's not difficult  
19 to confine, but as soon as you pump it out and have it  
20 in a pipeline, if someone -- if Alyeska recklessly  
21 risks something -- some damage to the pipeline and  
22 didn't take care of it and it caused widespread  
23 devastation, that crude oil would be difficult to  
24 confine.

25 Now, as far as the doctrine of ejusdem

1 generis, there are a couple things important about  
2 that. One is that it's limited to things similar --not  
3 very similar. As Mr. Hazelwood has cited in his brief,  
4 he uses the word, "very" to modify "similar". That's  
5 absolutely not the reading of the rule; it's the word  
6 "similar" to the things. You don't even get to that  
7 when there's no inconsistency between the general and  
8 specific language. You don't have to use this doctrine  
9 when there's no inconsistency, and there's no  
10 inconsistency in this general language. What they've  
11 done is they've laid out all the different -- not all,  
12 but an example of the types of things which can cause  
13 widespread devastation, and are difficult to confine,  
14 are flood, an avalanche, a fire, poison. Those things  
15 aren't confined to one specific area, they just run the  
16 gambit, radioactive material, and here we have crude  
17 oil. It's similar to a poison.

18 It's killed untold numbers of animals in  
19 Prince William Sound, just as a poison had. If someone  
20 had spilled 11 million gallons of cyanide in Prince  
21 William Sound, you can bet there would be a lot of  
22 animals dead. Just like we have here, where someone  
23 spilled 11 million gallons of crude oil, you've got  
24 untold numbers of otters, sea lions, eagles.

25 Your Honor, getting back to the part about not

1     construing a statute, not using extrinsic aides to  
2     interpret a statute. I think that's where the court  
3     should begin and should end because this statute  
4     doesn't need any extrinsic aides. It's contained  
5     within itself, and because oil, crude oil in a tanker  
6     that's been spilled, is difficult to confine, it's  
7     capable of causing widespread damage.

8             THE COURT: Mr. Madson, anything further?

9             MR. MADSON: Yes, Your Honor, just a comment  
10     or two. I think Mr. Adams' comments may be more  
11     appropriately found in the editorial page of the  
12     Anchorage News, but there are a couple of comments I'd  
13     like to make.

14             First of all, you can't look at just half a  
15     statute to determine legislative intent; you have to  
16     look at the whole thing. You can't read the statute as  
17     saying simply, "any difficult to confine substance,  
18     force or other means capable of causing widespread  
19     damage"; that's half of it. You go on and say:

20     "including these items." And without doing that,  
21     without arguing at great length, I would say that the  
22     additional items on this -- in this definition, are  
23     exactly what Mr. Adams characterized as a grocery list.

24             They did make a list, otherwise there's no  
25     purpose in having the second half of that definition.

1 So when they said they wanted to define what is this  
2 kind of a damage that they're talking about, widespread  
3 damage, they said "here's what it is," and they list  
4 it. And they don't say, like the Hawaii statute did,  
5 and here is a vast, vast difference, and here's my  
6 whole point:

7           The Hawaii statute is totally different, and I  
8 don't know how we can look at legislative intent in  
9 Hawaii because that's certainly not the issue, but the  
10 last part of the Hawaii definition, when they say  
11 includes et cetera, et cetera, et cetera, they say "or  
12 any other material, substance, force or means capable  
13 of causing potential widespread injury or damage."  
14 They added the catch-all phrase on there to include  
15 other things. Alaska didn't. Maybe they didn't intend  
16 to, but we don't know. That's what we're trying to  
17 find out here.

18           But that makes a substantial difference  
19 between the two statutes. Yes, Alaska's was based on  
20 the model penal code, but if you look at the model  
21 penal code, it is substantially different and are  
22 different than what Alaska finally passed. So, "based  
23 on" is certainly something no one can argue with, but  
24 why did they change it and come up with this definition  
25 and not follow what Hawaii did or what Pennsylvania may

1 have done, which is also based on the model penal code?  
2 New York -- a number of other statutes that are from  
3 states that utilized this risk of catastrophe, which is  
4 in the model penal code, Alaska didn't do that.

5 I certainly can't tell this court what was in  
6 the minds of the Alaska Legislature. Presumably they  
7 didn't know either. This was passed all at the same  
8 time and part of a big package. But somewhere along  
9 the line, somebody did.

10 Now, unfortunately, we don't have the  
11 legislative history on this one to show why these  
12 changes were made. We just have to assume they were  
13 made and assume that the legislature considered this  
14 when they passed it. It's the only thing we can do,  
15 and since, I would say, that it is not clear, it is not  
16 completely clear that crude oil belongs in this  
17 definition, then we must use the other aides that are  
18 available. And in doing so, it leads us back into the  
19 -- and back to the same conclusion, I think, that it  
20 simply wasn't intended to belong there.

21 It's hard to believe, perhaps, that the  
22 legislature, with oil on their minds, so to speak,  
23 didn't intend to do that, but certainly when in the  
24 same statute they are talking about oil and its  
25 potential hazards and what could happen, if they were

1 really thinking about it, it would seem that this was  
2 the appropriate time and place to put that into the  
3 definition. They apparently chose not to.

4 Thank you.

5 (Pause)

6 (4196)

7 THE COURT: The defendant's motion to dismiss  
8 the indictment on the grounds that the spilling of 11  
9 million gallons of crude oil does not create a risk of  
10 damage to property of another by the use of widely  
11 dangerous means is, insofar as the term, "widely  
12 dangerous means as applied," is denied.

13 MR. MADSON: We'll stay in the quagmire for a  
14 while longer, Your Honor, but this one is even, I  
15 think, clearer.

16 THE COURT: Is this property of another?

17 MR. MADSON: No.

18 THE COURT: Okay.

19 MR. MADSON: Well, I could certainly argue  
20 that. I just want to say a couple words on that.

21 The property of others, the motion, I think,  
22 has been pretty well briefed, and the real question  
23 here is who owns the fish, who owns the salmon down in  
24 Prince William Sound? And the state says, well, we  
25 don't, because they are a wild animal and nobody owns

1       them until they are actually confined in captivity.  
2       But Captain Hazelwood doesn't own them so, therefore,  
3       he has no right to risk damage to them.

4               The only thing I wanted to mention is -- I was  
5       thinking about this this morning, it raises, I think, a  
6       substantial risk, that the state could come back and  
7       recharge the defendant numerous times because he can't  
8       show which fish are owned by whom, and to keep creating  
9       this risk, based on ownership of fish which are not the  
10      defendants, we have a real potential problem for double  
11      jeopardy, as we can't specifically point to "X" number  
12      of fish and say they're each worth a dollar or two  
13      dollars each or anything like that.

14              One hatchery one time can say, well, there was  
15      a risk; based on the same Exxon Valdez spill, this one  
16      risked damage to \$100,000.00 or more. A year later, as  
17      long as you're still within the statute of limitations,  
18      another one can come in and you can't say that these  
19      are different fish. I know it's kind of a strange  
20      thing, but so are fish that aren't confined.

21              So that's all I really wanted to say on that.

22      (Tape: C-3529)

23      (0088)

24              THE COURT: Mr. Adams.

25              MR. ADAMS: Your Honor, with respect to the

1 definition of property of another, it's set out and  
2 it's property that someone has an interest in but the  
3 defendant is not entitled to infringe upon. In this  
4 respect, I believe the case of Hughes vs. Oklahoma, a  
5 US Supreme Court case from 1979, is dispositive. It  
6 specifically states, "The state's interest in  
7 maintaining the ecological balance in its waters, in  
8 state waters, by allowing the removal of inordinate  
9 minnows, may well qualify as a legitimate local  
10 purpose."

11 We consider the state's interests in  
12 conservation and protection of wild animals as  
13 legitimate purposes, similar to state interests in  
14 protecting the health and safety of their citizens.  
15 The state has an interest in the management,  
16 conservation and control of the fish and wildlife in  
17 Prince William Sound. That's why they set seasons.  
18 That's why we have limited entry permits. That is a  
19 legitimate local purpose, and those fish are the  
20 property of Alaska as well as the fishermen down in  
21 Prince William Sound. They have a reliance interest  
22 and the Alaska Supreme Court has been real clear on  
23 that issue in Rudder vs. State. They called it the  
24 reliance interest of all individuals using a fishery.

25 In addition, Your Honor, the state presented

1 evidence about the damage to the beaches, and those  
2 were, without a doubt, the property of Alaska. Alaska  
3 owns those in fee title, and those were damaged.  
4 Cleanup damage was part of that, and that was what was  
5 risked.

6 THE COURT: Anything further before my  
7 reading, Mr. Madson?

8 MR. MADSON: No, Your Honor.

9 THE COURT: I'm denying that motion also.

10 MR. MADSON: Now, the next issue, and I think  
11 this one is certainly one that deserves a great deal of  
12 attention, and maybe it's unfortunate that the immunity  
13 question kept us here for the better part of two and a  
14 half weeks, and deserved a great deal of attention  
15 also, but when we look at the different statutes that  
16 are involved in this particular case, I think it  
17 becomes abundantly clear, without a great deal more  
18 argument, that the legislature, the Alaska Legislature,  
19 passed certain special acts that pertain to exactly the  
20 situation here.

21 The statutory construction from this point is  
22 extremely clear, and that is if there's a special state  
23 statute that pertains to the subject, especially  
24 pertains to the subject, that one should be applied and  
25 not the general one. Now, this court can't tell the

1 prosecutor what statute to come under; that's why we  
2 have a separation of powers. But this court can say in  
3 interpreting the legislative intent and looking at the  
4 various statutes, the state certainly can tell the  
5 prosecution, you cannot use this one because the  
6 legislature specifically enacted this act, this law to  
7 cover this very situation.

8 So, that leaves us the question, did they?  
9 Under Title 46, what did the legislature do there in  
10 Title 46 in 1977? They looked at oil, and they looked  
11 at it very closely, and they encompassed a great many  
12 things in oil and spilling of oil, and the intent was  
13 clear on that.

14 They said what we want to do is protect this  
15 state, protect the environment, and in doing so, we're  
16 going to enact these laws. And some of them, as we  
17 already know is that under Title 46, they said if you  
18 knowingly spill oil -- and they didn't say how much --  
19 the state argues, well, there's a difference between a  
20 small spill and a big spill.

21 But if there's a difference in legislative  
22 intent, why didn't they say so? We have to assume, and  
23 I think correctly so, that when the legislature did not  
24 make a penalty consistent with the amount of oil that  
25 was spilled, but rather only with the defendant's

1 mental state, you can't assume that they meant only  
2 small spills and not big ones.

3           So, Captain Hazelwood then was charged by the  
4 state under the statute, oddly enough, for the same  
5 spill. So, if the state acknowledges that an 11  
6 million-gallon spill is subject to prosecution under  
7 this statute, as well as a five-gallon one or  
8 5,000-gallon one, doesn't this then come within the  
9 legislative intent that says, well, did you knowingly  
10 spill oil? Here's the penalty. If you negligently,  
11 that is criminal negligence to spill oil, here's a  
12 lesser penalty.

13           They looked at the exact problem they have  
14 here. Two minutes ago we heard, and we're going to  
15 hear again, over and over again, not the creation of  
16 the risk, but we're going to hear the result, and  
17 that's exactly why we're here today.

18           I would submit if Captain Hazelwood and the  
19 Exxon Valdez had narrowly missed Bligh Reef, we  
20 wouldn't be here. The creation of a risk would be just  
21 -- that happens quite often. Risk is created in Prince  
22 William Sound very often. We're here because of the  
23 result, and that result brings into play this statute  
24 and none other.

25           This situation is so like the Washington case,

1 I think it's Johnson vs. State, that's an old case out  
2 of the state of Washington where the legislature there  
3 said it is unlawful to take oysters from state oyster  
4 beds, plain old oyster beds. Now, the prosecution  
5 there looked at that statute and said, well, the  
6 penalty isn't big enough. Here's a guy that took  
7 oysters and we want to get him under the general theft  
8 penalty statute, stealing property that didn't belong  
9 to him. Long ago, I think it was in the early 1900s,  
10 the Washington Legislature said you can't do this.  
11 When the legislature specifically enacts a law, they  
12 could have made it -- the only reasons stealing oysters  
13 was unlawful was because the legislature said it was.  
14 And because they said stealing oysters is unlawful in  
15 this situation, that's the one that applies, and not a  
16 general statute. Otherwise, the state is left with  
17 virtually unfettered discretion to charge anything  
18 under any conceivable theory.

19 The point here, of course, is so clear that  
20 Title 46 covers this. Secondly, if Title 46 doesn't,  
21 then certainly Title 8 does, and that was also raised  
22 in the motion, I think, briefed, hopefully adequately  
23 there, but I'd like to comment, for a minute or two, on  
24 that.

25 That, of all things, is the pilot statute.

1 That's under business and professions under our code.  
2 And I think one might ask how in the world does a  
3 statute under business and professions pertain to the  
4 spilling of oil in Prince William Sound? And when one  
5 looks at the legislative intent, which there is no  
6 argument on this one, the cop of that bill when  
7 introduced is part of the record that was submitted as  
8 an exhibit to the motion, and what does it say? I mean  
9 the act covers marine pilots, state marine pilots in  
10 Prince William Sound; that's what it's for.

11 Now, that seems rather innocuous. It doesn't  
12 seem like it would be a crime or it shouldn't cover any  
13 criminal law, but it does. The legislature there said  
14 because of the danger of spilling oil in Prince William  
15 Sound and all the navigational hazards, the reefs, the  
16 rocks, the tankers, all the activity going on there, we  
17 recognize that risk, and here's what we're going to do  
18 about it. We are going to require that tankers of  
19 certain size have state pilots on-board.

20 And here's the other part, and this is exactly  
21 what fits our situation here. If past the pilot  
22 station, which they now believe, I believe, in most  
23 cases at least for pilotaged vessels, is Rocky Point.  
24 They say from there on where there's not a state pilot  
25 on-board, you must have a federally licensed pilot.

1           And isn't that what we're talking about here?  
2       That's the very situation. Now, the state's argument  
3       on this is -- and we'll get to that later on another  
4       topic, but they say, well, there's other things he did.  
5       And I would submit when the court is finally through  
6       with analyzing all the evidence, they'll come back to  
7       the conclusion that no, this is the only conceivable  
8       theory; that the mate, Cousins, didn't have this  
9       endorsement, therefore it fell within this particular  
10      statute. Clearly it fell within because, under their  
11      claim that is -- I'm not conceding that they're right,  
12      I'm just saying that for the purpose of this argument  
13      let's assume -- assume they're correct, that  
14      Captain Hazelwood violated this statute, Title 8,  
15      because he was below deck -- rather he was below the  
16      bridge, not on the bridge when Cousins didn't have this  
17      federal endorsement on his license.

18           As the court, I think, incorrectly categorized  
19      it, not qualified it -- I don't think it's a question  
20      of qualification, it means simply that you're qualified  
21      but the Coast Guard said that you have this endorsement  
22      which is necessary or may be necessary in certain  
23      waters. So, that's exactly what happened, and that's  
24      exactly what the statute was.

25           So, we have two statutes, and this one is even

1 clearer. Now, the unfortunate part of this argument  
2 for the state is the penalty isn't much. I mean it  
3 really makes it a darn shame when we can't penalize the  
4 guy for doing this. So they say, well, because the  
5 penalty isn't enough, we want to come within the  
6 general catch-all statute of criminal mischief,  
7 recklessly creating a risk.

8 One could go on and on about this, but I think  
9 it's adequately covered, and certainly when you have  
10 not only one but two statutes that the legislature  
11 dealt with, then there is nothing that could be clearer  
12 than under Title 8 -- or Title 46, for that matter, but  
13 particularly Title 8, when they say here's the risk  
14 we're trying to get around, to solve; we don't want  
15 this to happen. We don't want to spill oil down there,  
16 and here's the way we're going to do it.

17 In addition, the general statute here, and  
18 this is the first time, to my knowledge, it's ever been  
19 used in anything in a situation that even remotely  
20 comes close to this, but what we have here, oddly  
21 enough, is the greater statute, that is the felony  
22 statute actually emerges with and is kind of a greater  
23 included offense, if they will, rather than a lesser  
24 included.

25 I know this is really weird, but that's what

1 it comes out to with the oil spill statute, the  
2 misdemeanor, and here's how that happens. The  
3 misdemeanor statute says you have to prove criminal  
4 negligence at a minimal -- criminal negligence and  
5 spill oil. So there must be a spill and there must be  
6 criminal negligence.

7 Now, under Title 11, you have to show  
8 recklessness and a risk of the spill and damage -- that  
9 risk damage to property over \$100,000.00. Now, the  
10 ludicrous result of all this is that how can one, under  
11 the present legislative intent and what they were  
12 trying to accomplish, how can a person be penalized up  
13 to five years in jail for creating a risk of a spill  
14 when if he not only creates it but he does it, it's  
15 only a misdemeanor? This is a total flip around from  
16 the normal course of events, where you have the lesser  
17 offense included in the greater.

18 I don't know what kind of jury instruction a  
19 person -- a judge could give to a jury in this one, but  
20 you have to have one before you can have the other.

21 Now, the state will say you don't have to have  
22 the spill, you just have to create the risk of it.  
23 But, again, you have to look at the differences, if  
24 any, between the two statutes and how they relate to  
25 the basic interests that is sought to be protected by

1 the state. What basic interests is the state trying to  
2 protect here? And that one's obvious; they're trying  
3 to protect the environment from crude oil. So, what  
4 differences are there in the statute? Well, one  
5 specifically says here's what happens if you do it, and  
6 the other one says well, maybe this is what happens if  
7 you create a risk, then it might happen.

8 I think, and I would challenge anyone to come  
9 up with any kind of case law that says this can be a  
10 logical result, and hopefully somehow in all this mess  
11 and all this quagmire of legalese and legal underbrush  
12 that we're dealing with here, that we can kind of  
13 eliminate that and head right for the big timber and  
14 say there has to be some common sense, something has to  
15 make some sense, and this doesn't. It just doesn't  
16 make any sense.

17 THE COURT: Are there any elements under the  
18 Title 11 charge offense that would not have to be  
19 charged under the Title 46 or Title 8?

20 MR. MADSON: Damage to property over  
21 \$100,000.00. On that point, Your Honor, while  
22 recklessness...

23 THE COURT: How about the culpability,  
24 recklessness versus negligence?

25 MR. MADSON: That's what I was going to

1 comment on. Recklessness, under Title 11, while you  
2 have knowingly or criminal negligence under the other,  
3 Title 46, recklessness fits right in between those two,  
4 okay? Now, that says something right there. I mean it  
5 says that, you know, -- and again, on this topic, I  
6 think it's important to think of one other point here,  
7 and that is even though the statute says all that's  
8 required is criminal negligence, a person under -- I  
9 don't have the cite for it, but it's Title 11 under  
10 culpability -- culpable mental state, you cannot defend  
11 -- it is no defense that you act recklessly when the  
12 statute says all we need is criminal negligence.

13 And, you know, that kind of makes sense. You  
14 could imagine a situation where let's suppose somebody  
15 was tried under this very statute, and the statute  
16 stays criminal negligence, or even knowingly, for that  
17 matter, and the defendant testifies and the evidence is  
18 quite clear that -- and it's to the effect you can't  
19 convict me because I intended to do it. It's a higher  
20 mental state. I purposely went out there and poked  
21 holes in the pipeline, I did all these things. I  
22 wanted it to happen. That is no defense. You can  
23 still be convicted on that. So, the mental state kind  
24 of balances out and is encompassed by the lower mental  
25 state requirement of Title 46. I don't think that's

1 really an issue, nor do I think there's really a  
2 substantial issue on the elements. This goes to the  
3 multiplicities argument which I'm really not going to  
4 cover, but it seems that under Alaska law, they don't  
5 follow the rule that says you must look at each statute  
6 and see if there are different elements involved in  
7 each one.

8 I think under Alaska law they -- and that's  
9 the Witten (ph) analysis and all the rest of them that  
10 are for post-Witten (ph) cases, that say we're not  
11 going to do that, that's the old Blockbuster [sic],  
12 whatever it is, United States vs. Blockbuster [sic], or  
13 something like that. Anyway, under that analysis, they  
14 say we're not going to follow that. What we're going  
15 to do is just what I said, just a few minutes ago,  
16 we're going to look at the differences, if any, between  
17 the two statutes and how they relate to the interests  
18 that the state is seeking to protect.

19 Either they go from different points but come  
20 together and say well, this is what we're trying to  
21 accomplish, and we're not going to look at specific  
22 little elements, we're going to say -- or do they  
23 really mean the same thing? And if they do, then the  
24 question is, which one applies? And certainly the  
25 specific applies over the general. The rule of

1 leniency also applies in criminal cases if the lesser  
2 will prevail over the greater.

3 For all these reasons, Your Honor, I think  
4 it's abundantly clear that the special legislation  
5 enacted by our legislature should prevail over the  
6 general criminal law.

7 Thank you.

8 MR. ADAMS: Your Honor, with respect to the  
9 general special rule of statutory construction, it  
10 appears that there are two ways to interpret that rule  
11 of construction. And the first way is the Washington  
12 State vs Shriner, which is cited by both the defendant  
13 and the state, which requires that the general statute  
14 must be violated in each instance where a special  
15 statute is violated, otherwise the statutes are not  
16 concurrent and there's no problem with the general  
17 special rule of construction, where you only give the  
18 special statute power. Now, in the case of United  
19 States vs. Computer Science Corporation and Simpson vs.  
20 United States, the United States vs. Computer Science,  
21 the Fifth Circuit, I believe, or the Fourth Circuit,  
22 and Simpson and the US Supreme Court, they kind of  
23 carved out a little exception to that rule, from my  
24 interpretation, that where the legislative intent,  
25 through legislative history, is very clear that one

1 statute is to be the special statute and one statute is  
2 to be the general statute. You don't have to have the  
3 pure identity of elements.

4 So they probably have not applied that  
5 Washington rule a little bit. However, in the United  
6 States vs. Computer Science Corporation in the court of  
7 appeals, they stated that it has to be very clear that  
8 that's the legislative intent. And in the Fourth  
9 Circuit cited Simpson vs. US Supreme Court case and  
10 said that the Simpson analysis was correct, but they  
11 looked at the legislative history of that one statute  
12 which gave an aggravated sentence for someone who  
13 committed a felony in the possession of a handgun, and  
14 it specifically mentioned the other statute which was  
15 the more general statute. And in the Fifth or Fourth  
16 Circuit said that that type of language was absent --  
17 it was absent in the mail fraud statute versus the Rico  
18 (ph) statute, and they said without that language there  
19 was no -- nothing to construe, and the federal  
20 government could go under both theories. And that  
21 language they used was the Blockberger (ph) test for  
22 double jeopardy, and the Blockberger (ph) test is a  
23 test that apparently the state doesn't use. However,  
24 speaking solely of the double jeopardy issues,  
25 whichever tests the state uses, it's premature to get

1 into that thing that says that issue.

2 If a restriction to a single punishment  
3 applies, if and when the time should ever arise when  
4 the defendants or some of them are found guilty, both  
5 for wire fraud and mail fraud on the one-hand and false  
6 claims against the United States on the other, whatever  
7 the answer to that question may be, however, it does  
8 not relate to the right of the government to prosecute  
9 under both the wire fraud or a mail fraud statute and a  
10 false claim statute.

11 Now, that language is important because the  
12 state of Alaska has the exact same language in a case  
13 called Robinson. It's in Robinson -- I've got the  
14 citation for that, it's 487 PS 681. In that case, they  
15 talk about multiplicitous charging, and they said that  
16 Witten (ph) provides specifically that only one  
17 sentence may be constitutionally imposed on the two  
18 counts charged him, herein, but says nothing about  
19 submission of both counts to the jury. We find no  
20 error in this case in submitting both counts to the  
21 jury for their consideration.

22 Now, with respect to getting back to that  
23 general versus special legislation, we have no identity  
24 of elements here. The major difference is the amount  
25 of damage that is risked in the criminal mischief

1 statute. Every time someone negligently spills five  
2 gallons of crude oil in the Port of Valdez, and it  
3 probably has happened numerous times before, there's a  
4 violation of Alaska's oil spill statute. However,  
5 under no circumstances would that violate the criminal  
6 mischief statute because there's no reckless risk, and  
7 it's the risk of damage in excess of \$100,000.00. It  
8 simply doesn't exist.

9 Now, with respect to statement about the  
10 reason we're here is because -- not because of risk,  
11 but because of actual damages and that we wouldn't be  
12 here if the Exxon Valdez had missed that reef, if we  
13 had found out about it, he had missed that reef, we  
14 would definitely be here. But the bottom line is that  
15 it's the criminal mischief statute and the oil spill  
16 statute have both been violated and there's no reason  
17 the state cannot prosecute under both.

18 In Grey, a murder case back in the 1960s, the  
19 state was allowed to proceed on both a felony murder  
20 and a first degree murder, intentional killing, and the  
21 supreme court specifically said that was proper to give  
22 both charges to the jury and let them decide if the  
23 state's theories were proper.

24 And at that time, after the defendant was  
25 convicted of both, the oil spill statute and criminal

1 mischief statutes, then the court can decide whether  
2 double jeopardy issues come into play. But until he's  
3 convicted, there's no issue.

4 MR. MADSON: Well, Your Honor, unfortunately  
5 Mr. Adams missed the point. The point is, as I started  
6 out, whether the legislature intended to cover the  
7 subject by special legislation. We got a little bit  
8 off the track because there is an analogy that can  
9 rightfully be -- with regard to multiplicitous  
10 charging, which then gets us into the areas of whether  
11 it can go to the jury or not.

12 I would ask the court to be very careful in  
13 not stepping too far in this direction, because that's  
14 getting away from the major point here. And there are  
15 a number of Alaska cases that were cited for the very  
16 proposition that I've argued here, which the state, I  
17 would submit, has not adequately opposed, countered,  
18 that there is this proposition in Alaska, as everywhere  
19 else, that when it becomes clear that the legislature  
20 intended to cover the subject, not by identity of  
21 elements, but cover the subject as it relates to a  
22 basic interest ought to be protected, then that one  
23 prevails over and above a general statute that has the  
24 same interests, or could be arguably, at least, as the  
25 same interests.

1           As far as the damage is concerned, we talked  
2 about small amounts of damage. What about damage that  
3 was \$90,900.00, not \$100,000.00? I guess that's a  
4 misdemeanor. There's some magic involved in this  
5 \$100,000.00 figure. They can't come up with a risk of  
6 damage that exceeds \$100,000.00. The point here is the  
7 legislature did not set this amount. I don't think the  
8 court can add to a statute.

9           Really, what the court would be doing, I would  
10 submit, would be amending the statute by putting a  
11 judicial interpretation on the end of it that said,  
12 well, this only applies up to \$100,000.00 under Federal  
13 Title 46. Over that, then we have to go to Title 11.

14           Well, with the legislature, with all their  
15 faults, I'm sure we can't look at it and say whether  
16 they should have done this or shouldn't have done it.  
17 We have to look at it and say this is what we did, and  
18 since they didn't put a upper limit on it, there is a  
19 logical, natural inference that there is no upper  
20 limit. We can't arbitrarily put one there.

21           THE COURT: Mr. Madson, I don't believe Title  
22 46 or Title 8 was intended to cover all the conduct and  
23 circumstances, in this case where a tanker in excess of  
24 200,000 dead weight tons went aground and spilled  
25 11 million gallons of crude oil, and the devastation

1 occurring in this case. And it's clear that there is  
2 no such damage similarity or identical elements in 11  
3 46, 42 and Title 46 and Title 8; there's different  
4 conduct and different circumstances.

5 The motion to dismiss the indictment on the  
6 grounds that the state didn't charge the defendant is  
7 denied.

8 I will concede, Mr. Madson, that your  
9 arguments are very graded. They're very interesting  
10 and they're very challenging, but they defy common  
11 sense, and if there was a common sense ruling to be  
12 made, I would deny it because of the common sense, but  
13 there are other legitimate reasons to deny it as well.

14 MR. MADSON: Well, Your Honor, I have to say  
15 that the legislature of this state is also creative and  
16 must defy common sense also. I have to share some of  
17 the credit.

18 THE COURT: All right. Thank you. Why don't  
19 we take a little break, Mr. Madson, and come back and  
20 argue the next one. Which one are you going to argue  
21 next, so we can gear up for it?

22 MR. MADSON: Well, Your Honor, I sense when  
23 I'm beaten. I'm going to argue the motion to dismiss  
24 for insufficient evidence, and I think I will probably  
25 wrap it up with that.

1 THE COURT: Okay. We stand in recess.

2 THE CLERK: Please rise. This court stands in  
3 recess, subject to call.

4 (Off record - 10:02 a.m.)

5 (On record - 10:26 a.m.)

6 (1169)

7 THE COURT: Be seated. Mr. Madson.

8 MR. MADSON: Going to the top of my list, Your  
9 Honor, I'm not so sure it's on the top of yours, but  
10 that's the motion to dismiss counts one, two and three,  
11 for insufficient evidence.

12 This one, Your Honor, does not deal with  
13 imaginative or creative argument. The issue was  
14 straight-forward, simple, and we know what the rule of  
15 law is, and that very simply is whether the evidence  
16 standing alone is sufficient for an indictment to  
17 result or a conviction to result.

18 Now, I'd like to take these -- count one first  
19 and work my way down the list. I think, Your Honor,  
20 that this one is one that I would urge the court to  
21 look very carefully at and review the grand jury  
22 testimony.

23 THE COURT: For the record, I should tell you  
24 I have read the grand jury transcript. I figured  
25 early-on I had to, so...

1 MR. MADSON: I was sure the court did. I was  
2 going to suggest that perhaps the court review it again  
3 in light of this argument. It may or may not create  
4 some other questions in the court's mind.

5 But I think the basic issue here is what's the  
6 main element here the state has to prove? And this is  
7 only one, and that is the element, the mental state of  
8 recklessness, that he was aware of -- Captain Hazelwood  
9 was aware of and consciously disregarded a substantial  
10 risk that this result occurred.

11 Well, it gets to the next question, what did  
12 he do that was reckless? What theory does the state  
13 have to support the allegation of recklessness and what  
14 theory was presented to the jury that they could use  
15 that theory and come up with an indictment that would  
16 by itself result -- that could result in a conviction?

17 Before this court was involved in the case, we  
18 filed a motion for a bill of particulars. I think if  
19 the court would have reviewed the grand jury testimony,  
20 and just looked at it from the defendant's point of  
21 view and read this, and you say to yourself, what are  
22 they doing here that -- what are they saying is  
23 reckless?

24 Now, Ms. Henry made comments to the grand  
25 jury, to begin with, and some of the evidence didn't

1 bear out what she said that she was going to prove. I  
2 think after we had the full hearing here, it became  
3 obvious why she said these things, because until she  
4 heard the witnesses, she had no idea what they were  
5 going to say or what theory they were going to use.

6 But, in any event, the state went ahead and  
7 with regard to the motion for a bill of particulars,  
8 would not file a specific response as to what theory.  
9 Judge Cutler said, "Well, I'm denying that for now, but  
10 I'm leaving that open -- we're leaving that open for  
11 now."

12 In response to our motion, the state has now  
13 come forth and said, here are our theories. Number one  
14 -- I assume this is a theory, because the state said  
15 "We're not going on just one element, the one theory  
16 that Hazelwood was reckless, because he turned over the  
17 command of the ship to Cousins who didn't have the  
18 endorsement."

19 There are other theories, and they are, I  
20 suppose, drinking in town some four hours before the  
21 fact. There's no evidence, of course, of the effects  
22 of alcohol on Captain Hazelwood before the grand jury,  
23 except that which is favorable. I think that's an  
24 important point. There is not one witness that even  
25 hints that he was under the influence. The testimony

1 is to the contrary. The state's response to that was,  
2 "Well, he was acting in a cavalier fashion because he  
3 drank in town before he got to the ship." I would  
4 submit that that is a cavalier fashion that is not the  
5 same or synonymous with recklessness, and I think the  
6 state would have to agree with that.

7 Secondly, if this were a civil case, somewhere  
8 along the line somebody would be saying, where's the  
9 connection here? Where's the causation factor? How  
10 does this become the proximate or a substantial cause  
11 of the result of the spill? Certainly having some  
12 drinks four hours before the fact in town had nothing  
13 to do with the spill. There isn't the slightest bit of  
14 evidence that one could even infer that this was, and  
15 there was a connection between the two. So, that  
16 theory is clearly out of the picture.

17 The next theory is, supposedly, the ice. The  
18 ice somehow was -- whatever the ice situation was, such  
19 that Captain Hazelwood acted recklessly in trying to  
20 avoid it. This gets a little more complicated for the  
21 fact that there was testimony here. The Court heard,  
22 in addition to Mr. Linton's opening statement that  
23 basically said there was ice, and this is routine to  
24 try to maneuver around the ice. The Coast Guard  
25 discussed that.

1           That gets us kind of in a muddy area because  
2 what was presented to grand jury, and solely there, was  
3 simply that going around the ice was a routine  
4 maneuver. The pilot, Edward Murphy, made that  
5 statement very clear. I mean it's also clear from the  
6 fact that the Exxon Valdez radioed the Coast Guard and  
7 said, "We're diverting out of the lanes because of  
8 ice." "No problem," the Coast Guard was not alarmed,  
9 it's a perfectly routine maneuver. So, that didn't  
10 cause anything; that theory is gone.

11           The speed of the vessel, somehow that was kind  
12 of thrown in there as perhaps it was going too fast for  
13 that area, for being in the ice. Well, if it was in  
14 the ice, maybe they'd have an argument, but there was  
15 no evidence to show, no evidence presented to grand  
16 jury that going around the ice required the ship to  
17 slow down, not one bit.

18           In fact, common sense, if you use that phrase,  
19 common sense in my opinion says if you're going to go  
20 through the ice, it's prudent to slow down because  
21 you've got to wind your way through it. On the other  
22 hand, if you're going around it, there's no purpose in  
23 slowing down. You maintain the ship's speed, you  
24 maintain everything else except your change of course.

25           So, certainly Captain Beevers was the key to

1 all this because he's the expert and he's the only one  
2 who can interpret what was done and aid and assist the  
3 grand jury in why things are done this way and what  
4 would be the result. And, obviously, he was in a  
5 position to say if something was clearly out of the  
6 ordinary, or something no prudent master would do,  
7 something that would be reckless, he was the person  
8 that would have said it. And he didn't. He didn't say  
9 anything about going around ice is reckless or anything  
10 else, the speed of the vessel was reckless, setting the  
11 course for Bligh Reef.

12 Without stepping up to the chart, Your Honor,  
13 it's obvious that if you want to go around a place  
14 coming down, flowing in a southerly direction, you have  
15 to turn farther south, get out of the lanes and go  
16 around it. You set your course, not intentionally for  
17 Bligh Reef. No matter where your course is set in  
18 Prince William Sound, if it's set in a direction that  
19 you don't turn, you're going to hit something besides  
20 water; you're going to hit a large rock.

21 That's totally meaningless because the  
22 evidence was the course was set to go around the ice,  
23 and certainly it was in a direction that, if not  
24 altered, would be Bligh Reef. And doing this was  
25 routine and common.

1           The failure of supposedly to communicate with  
2 Cousins, I mentioned this earlier in another argument,  
3 how the state grand jury was left with the impression  
4 that Captain Hazelwood did nothing, he just left the  
5 bridge. Kagan and others testified that there was --  
6 at least Kagan testified there was conversation on the  
7 bridge before this happened. He didn't hear what was  
8 said. Again, I think we have to infer that what was  
9 said was, "Here's what you do, Mr. Cousins. When you  
10 get here, you change your course." There is certainly  
11 no evidence to the contrary. There is nothing that was  
12 presented that would show that Captain Hazelwood simply  
13 failed or neglected or intentionally let Cousins be the  
14 watch officer or have the con without some commands,  
15 some directions.

16           The Court has already ruled on the exculpatory  
17 evidence, which sum directly on this point, which says,  
18 here's what happened on the bridge at that time. The  
19 grand jury didn't have that, but on the other hand,  
20 what did they have to show the contrary? Is it enough  
21 to guess and speculate? I would submit it isn't.

22           The auto pilot was another theory that the  
23 state said -- in Ms. Henry's initial comments to the  
24 grand jury, that it was going to be on and not turned  
25 off, and consequently when the ship was tried to steer

1 it, it couldn't be done and they hit the rock.

2 That contrasts substantially and directly with  
3 the testimony because Kagan, who was the helmsman at  
4 the time, said it was off. He said Cousins, I believe,  
5 turned it off. They both may have reached towards it  
6 at the same time, but the auto pilot, whether it was a  
7 factor prior to that time or not, whether it should  
8 have been or shouldn't have been, and there's a little  
9 confusion here on this point, because I think  
10 Captain Beevers testified that -- or Murphy, one of the  
11 two, said something about "No, it wouldn't be prudent  
12 to have the auto pilot on in that area."

13 That area he was referring to was the narrows.  
14 Yeah, that would be correct; it wouldn't be prudent to  
15 have it on in the narrows where it wasn't. It was on  
16 in Valdez Arm where they did not say it would be  
17 prudent or not prudent. I believe the term they used  
18 was, well, that's up to -- I think Murphy said, "Well,  
19 that's up to the individual master as to whether it  
20 would be on or not." Certainly not negligent,  
21 certainly not reckless. And it certainly wasn't on. I  
22 mean how -- this court would have to, frankly, second  
23 guess and directly find that Kagan did not tell the  
24 truth when he said it was off. That simply can't be  
25 done.

1           And where does that leave us? The only  
2 possible theory; that Cousins had no endorsement on his  
3 license to pilot, to be a federally licensed pilot in  
4 Prince William Sound between Hinchinbrook and the pilot  
5 station. That's where it leaves us.

6           Now, this gets us to this very situation where  
7 the state says that isn't reckless. They have made an  
8 admission on pages 60 and 61 of their opposition. They  
9 have cited the court before, where they clearly say  
10 that this alone is not enough to show recklessness, and  
11 this alone is exactly the only possible theory under  
12 which there was some evidence presented that could show  
13 that as a result he did something wrong. Something he  
14 should have done or something he didn't do, and that, I  
15 suppose, you could argue was a factor in causing this  
16 disaster.

17           Now, this was important because the grand jury  
18 seemed to be concerned only with this particular  
19 theory. The court recalls the end of the grand jury  
20 when they say, well, we're confused about this pilotage  
21 thing, and that's where they get Beevers back there  
22 again to say, well, he should have been on the bridge.  
23 It's clearly apparent that the grand jury centered in  
24 on this particular theory, and it would seem apparent  
25 that this was the only one because they're assuming the

1 grand jury were reasonable people, that was the only  
2 thing they could zero in on was that theory.

3 So, I would like to go on, but first of all,  
4 before I leave that topic, I would ask the Court, since  
5 we have separate theories here that are alleged by the  
6 state, totally separate theories, I would respectfully  
7 ask the Court to rule on each one of these theories,  
8 and I think it's appropriate for this reason:

9 If we're at trial and there's insufficient  
10 evidence to show one of the other theories, certainly  
11 it's subject to a motion for a judgmental acquittal.  
12 Certainly if there are separate theories presented to  
13 the grand jury, we have the right to say this evidence  
14 on this theory is insufficient and therefore it should  
15 be ruled on, so we don't get into this -- a lot of  
16 irrelevant evidence that is not a condition to go to  
17 the trial jury as opposed to the grand jury. And I  
18 would urge the Court to follow my argument and rule on  
19 each one of these as to which one applies or even if  
20 they all do in some kind of a composite or altogether  
21 type of analysis.

22 THE COURT: I'm not sure I understand what you  
23 are asking the Court to do.

24 MR. MADSON: Your Honor, what I'm saying is  
25 that the state is saying here is why Hazelwood was

1 reckless; he drank in town, he left the -- another one,  
2 he left the bridge when Murphy was the pilot, and  
3 according to -- out to the pilot station, he wasn't on  
4 the bridge. The next theory is certainly that he  
5 somehow, in going around the ice, he was going too fast  
6 or something about this ice, which I, frankly, didn't  
7 quite follow. The next one is failure to communicate  
8 with Cousins and the auto pilot. These are all  
9 separate theories.

10 As I understand the state's argument, I may be  
11 incorrect in this, as I read it, they're saying because  
12 we raised the issue early on by saying the only thing  
13 we can see here is this pilotage thing. And their  
14 response was, oh, no, these other theories, and here  
15 they are. So, I am simply asking the Court to look at  
16 these individually and rule on them individually so we  
17 don't get a lot of, I think, a muddied up situation  
18 before a trial jury later on, and I think it really  
19 would. I think we have a right to this.

20 THE COURT: It sounds like you are asking the  
21 court to make some evidentiary rulings here, which is  
22 not, I think, the function of this hearing. This  
23 hearing is to determine whether the evidence -- all the  
24 evidence presented to the grand jury, and like most  
25 favorable to the state, and the inferences from that

1 evidence is adequate to persuade reasonably minded  
2 court jurors, unexplained or uncontradicted, would  
3 result in a conviction. I think I can look at all the  
4 evidence. I can't take one piece of evidence out and  
5 say it's not going to be admissible at trial unless  
6 there's a motion specifically on that point.

7 (1906)

8 MR. MADSON: I'm not asking the Court to rule  
9 on whether the evidence would be admissible or not.  
10 I'm asking the court, certainly, to make evidentiary  
11 findings on the grand jury testimony. I'm asking the  
12 court to look at the testimony regarding the auto pilot  
13 that was before the grand jury in saying whether or  
14 this was sufficient or it wasn't. Whether the state  
15 can come up with something in addition to that or  
16 totally on that theory, but more evidence at trial,  
17 that's a question that remains to be seen.

18 I'm not saying that this court is precluding  
19 the state from doing anything at trial. I was trying  
20 to make an analogy, and perhaps it was a bad one.

21 THE COURT: Okay. I'm not sure you were  
22 communicating that. What I intend on doing is making a  
23 decision based on all the evidence presented to the  
24 grand jury for counts one, two and three, and if I  
25 conclude that it's insufficient for count one, then

1 you'll have your motion granted. If all the evidence  
2 is sufficient, then it will be denied. I'm not going  
3 to single out one piece of evidence and say will this  
4 be enough by itself or not and then another piece of  
5 evidence to determine whether or not that would have  
6 been enough by itself. I'm going to look at all the  
7 evidence, Mr. Madson.

8 MR. MADSON: I understand what the court is  
9 saying, and I think the court is incorrect. I  
10 respectfully disagree...

11 THE COURT: Well, you know, there are two  
12 whole floors to go over that possibility in this  
13 building.

14 MR. MADSON: Oh, I'm sure it will be there  
15 eventually, but I'm saying, again, the argument I  
16 thought was fairly simple in this point.

17 Let's assume there's only one theory here, and  
18 that is the auto pilot, just one. If the court would  
19 rule on that, based on that evidence, I am simply  
20 saying that it's appropriate and necessary to rule on  
21 that. If it's a separate -- if the state contends it's  
22 a separate theory of recklessness, that it either is  
23 enough evidence or it isn't, but the court certainly  
24 can do whatever it feels appropriate.

25 I'm not going to, you know, spend the rest of

1 the day trying to convince the court otherwise. I've  
2 never succeeded in doing that in my life.

3 But with regard to count two, there ought to  
4 be something easy in this case, and this is it. Count  
5 two, insufficient evidence, this came to me later on  
6 and it struck me just right out of the blue. The first  
7 thing, I thought was pretty obvious was, we had to  
8 guess, speculate or use conjecture to see or determine  
9 from the evidence if Captain Hazelwood was trying to  
10 get off the reef is what the state is saying, he was  
11 trying to get off the reef.

12 Well, Beevers looked at all these charts, he  
13 analyzed the federal logs, he analyzed the course  
14 recorder, he did all these things and said, "Well,  
15 here's what the maneuver was." And a grand juror asked  
16 him, "Well, were the engines ever astern, ever put in  
17 the reverse position?" And he said, "No."

18 Common sense says if you run on a reef and you  
19 want to get off, you go backwards, not forwards. You  
20 do that with a car when you're stuck in the snow, you  
21 do all this. That was the obvious thing that struck  
22 me. There simply was no evidence on this to whether he  
23 was getting on or off.

24 And then secondly, what evidence was presented  
25 that if he was trying to get off, either by going

1 forward over the reef or sideways or any direction,  
2 what evidence was there that something was going to  
3 result that was in addition to the damage that already  
4 occurred? There wasn't any. Beevers didn't say  
5 anything.

6 I suppose you can say, well, gee, common sense  
7 says that if you're on the rock and you're trying to  
8 get off, you're risking this additional damage. Which  
9 leads me to the one that, I think, is a critical issue  
10 here. Suppose that were the case; suppose all this can  
11 be assumed and there is sufficient evidence upon all  
12 this, that he was getting off the reef, that there was  
13 a risk, that additional damage would result.

14 I would defy anyone to read that grand jury  
15 testimony and have any opinion in there, any opinion,  
16 any evidence that says on count two, which is a total  
17 and separate criminal charge, that there was damage  
18 that was likely to result that would exceed  
19 \$100,000.00.

20 Now, this is extremely important because for  
21 the purpose of count two, we have to assume, because  
22 the evidence was presented in such a way that the ship  
23 hit the reef and oil was leaking, a lot of oil. A lot  
24 of witnesses said that. Everyone that was on-board  
25 said "there's oil, it's all over the place." Count two

1 has the same identical elements as count one, so if we  
2 assume there's no count one at all, the state is  
3 required to prove that the risk of additional damage  
4 exceeded \$100,000.00, and that is -- here is this big  
5 puddle of oil that's rapidly spreading. They have to  
6 separate this out and say here's how much damage is a  
7 result for count one, and now, here's the additional  
8 damage for count two. And that is so obvious that it  
9 escapes the reader's attention when you go through it  
10 the first time.

11 But the important things here are, these are  
12 totally separate counts, and the elements have to be  
13 met in each identical one, and that one is totally  
14 lacking. There was tons of evidence in there from  
15 people about fisheries, about, you know, all these  
16 experts, what could happen, what might happen if the  
17 salmon later in the season are affected by this, how  
18 much damage would result? But we didn't hear one  
19 single word about the additional damage that would be  
20 necessary for count two. Not a dollar, not a million  
21 dollars, not anything. There is no way of knowing  
22 that. I would submit it's impossible to tell that.

23 You've got a huge amount of oil flowing on the  
24 top of the water. How could anyone say that the  
25 additional risk from doing this would be this amount or

1 another million gallons, half a million? There was no  
2 way anyone could do that.

3           Lastly then, count three is an easy one, too.  
4 Count three says it's combined recklessness.  
5 Captain Hazelwood is apt to be reckless before he hit  
6 the reef and after he hit the reef. And that's what  
7 three says. What count three says is basically what  
8 count one and two say. So, how can there be a separate  
9 charge which says exactly the same thing as count one  
10 and two? That makes absolutely no sense at all. It  
11 requires, in addition if count two fails, obviously  
12 count three would fail. But independent of that, count  
13 three has to fail just because the grand jury indicted  
14 on counts one and two. You can't combine them  
15 separately here, then together over here.

16           Thank you.

17           THE COURT: Mr. Cole, I'd like to have you  
18 address the wording of counts one and two and three and  
19 why it was necessary to indict on count three when you  
20 have count one and two, and why the language of count  
21 one and two in the first place, rather than just  
22 actions in striking Bligh Reef with the Exxon Valdez,  
23 those words rather than before and after and a  
24 combination of the two.

25           And I'll tell you right now, they seem to be a

1 little confusing, a little redundant and unnecessary,  
2 and you'll address that after you are finished with  
3 your argument.

4 MR. COLE: A couple things, Your Honor, that I  
5 think need to be cleared up. Mr. Madson uses the word  
6 "theory" a little bit differently, and he probably is  
7 taking it out of context. And I'm going to address  
8 that as we go through some of the things that you've  
9 noted.

10 I want to remind the court that what we're  
11 here for, and the court's already noted it; to look at  
12 the evidence and see whether there was sufficient  
13 evidence based on -- presented to the grand jury to  
14 support the indictment. A review of the case law says  
15 you look at the four corners of the grand jury  
16 transcript, you look at the exhibits presented, you  
17 look at the elements of the offense as charged and you  
18 say, taking all reasonable inferences in the light most  
19 favorable to the state, would the evidence be adequate  
20 to persuade reasonably minded persons that a conviction  
21 is warranted?

22 Mr. Madson has focused on the mental element  
23 of recklessness. As we're all aware, that's a very  
24 difficult thing to actually prove. That's why we set  
25 out in our brief about circumstantial evidence. That's

1 why we set out that that's an acceptable way of looking  
2 at it for trial jurors and it's an acceptable way for  
3 Your Honor.

4 As to the actual elements of the effects, the  
5 criminal mischief statutes are very clear. You have to  
6 have no right to do something, no reasonable ground to  
7 believe, recklessly create a risk of damage to the  
8 property of others. A person is reckless when they are  
9 aware of and consciously disregard a substantial and  
10 unjustifiable risk. And we submit, Your Honor, that  
11 during the course of Mr. Madson's memorandums, he mixes  
12 up risk of damage with actual damage, and that became  
13 apparent again today.

14 Mr. Madson says that we have to prove that  
15 Mr. Hazelwood was aware of and consciously disregarded  
16 a substantial and unjustifiable risk, that when he left  
17 the bridge with Greg Cousins -- Greg Cousins would run  
18 the Exxon Valdez up on the reef. And that's an exact  
19 quote on page 37 of his original document.

20 This is wrong because of two reasons. First  
21 it assumes that the only basis for recklessness, which  
22 Mr. Madson has again talked about today, is that one  
23 act of leaving Greg Cousins in charge, and that is not  
24 true. There were a number of acts; not theories, acts.  
25 And I'll get to the important distinctions of that in a

1 second.

2 Second, it assumes that the statute deals only  
3 with actual damages, that the ship would end up on the  
4 reef. Mr. Madson continually fails to make that  
5 distinction in his arguments. Actual damage only  
6 applies -- the element of actual damage only applies  
7 when a defendant is charged with criminal mischief in  
8 the first degree. So, Your Honor, you have to keep  
9 that in mind when we're going through these elements.

10 Now, I'd like to talk just for a second about  
11 what constitutes recklessness. Mr. Madson would like  
12 to say, look, I have one act and that's recklessness,  
13 and if it's not reckless, that's wrong. But that is  
14 not what the law is, and that is not what -- that just  
15 is beyond comprehension.

16 Let me give you an example. The best example  
17 is the manslaughter case. A person goes out, has too  
18 much to drink, gets behind the wheel of a car and  
19 drives off and causes a death. We charge that person  
20 with recklessly causing the death of another.  
21 Mr. Madson would say under his theory the reckless act  
22 was driving while drinking, but really that's only --  
23 that's really broken down into two acts. The two acts  
24 are drinking in the first place and then the second is  
25 getting behind the wheel and driving. Because apart --

1 just by themselves, that one act is not reckless; it's  
2 not reckless to drink in a bar and it's not reckless to  
3 drive. But it's the combination of those acts that  
4 makes a person reckless.

5 Typically you have a lot of examples of that.  
6 I'm sure the court has sat up here and watched numerous  
7 manslaughter cases where it's not just the act of  
8 drinking and it's not just the act of driving, but then  
9 it's how you drive.

10 Always evidence comes in in manslaughter cases  
11 about how people were speeding, about how they were  
12 driving on the wrong side of the lane, about how they  
13 went through stop signs. None of those acts in and of  
14 themselves are theories of recklessness, which is what  
15 Mr. Madson continually referred to. By analogy, we  
16 have a number of acts which constitute reckless conduct  
17 with Mr. Hazelwood, and if you look at the indictment,  
18 that's how it was worded. It was the acts taken before  
19 the Exxon Valdez hit the reef. It was designed to be  
20 broad enough to encompass everything he did.

21 Now, let's begin at the beginning. . It was a  
22 number of things that I cited in my brief, but  
23 Mr. Madson says, "Well, just drinking in and by itself  
24 is a insufficient act of recklessness." That's not the  
25 point, and Mr. Madson misses the point.

1           It doesn't take an expert to come in and show  
2 that drinking prior to taking on substantial  
3 responsibilities shows a sort of callousness toward  
4 responsibility. You don't have to be under the  
5 influence to have alcohol affect your judgment, and you  
6 don't have to have an expert testify to that. That's  
7 something that's common knowledge.

8           Mr. Hazelwood, the evidence was that he had  
9 drinks both before, at several different places before  
10 he went aboard. Let's talk about his position, because  
11 when in analyzing whether or not he was aware of and  
12 consciously disregarded, we need to look at how a  
13 reasonable captain in his position would act.

14           The responsibilities of a tanker captain are  
15 two-fold: Taking care of the responsibility of your  
16 crew, seeing to it that your cargo reaches its  
17 destination safely. A tanker captain knows -- he  
18 basically sits on what we would consider to be an  
19 ecological time-bomb. In assessing his performance,  
20 what you look at is, you look at it under the theory  
21 that I would consider more of a risk management theory.  
22 You do everything that you can to avoid the risk of  
23 becoming the actual incident. The risk in  
24 Mr. Hazelwood's case -- Captain Hazelwood's case, is  
25 that oil -- there will be an oil spill. And so in

1 evaluating his performance, you look at not only what  
2 he did but what he didn't do.

3           What he did was a number of things. He drank  
4 when he was supposed to be not -- when he went into  
5 town, before coming on-board. Number two, he is  
6 ultimately in charge of the tanker, even though the  
7 pilot, the state pilot navigates. The state pilot  
8 talked about that. So does the other crew members. He  
9 was not there to fulfill his responsibilities as the  
10 ultimate overseer and commander of this vessel. He was  
11 downstairs for nearly an hour and a half, and that's  
12 what the testimony was. When he came on deck, he  
13 avoided ice. We're not saying that the act of moving  
14 to avoid ice is reckless; we're talking about the  
15 manner in which it was done.

16           Just like it's not reckless to drive down the  
17 street and pass somebody on the other side, but it is  
18 reckless if you pass somebody when there's another car  
19 coming, for instance, and you have a head-on collision,  
20 and the manner in which you do it is one of the  
21 elements that constitutes recklessness.

22           In this case, the manner in which he did it  
23 was, and the testimony before the grand jury was, yes,  
24 you can go in to the other out-bound lane, but you  
25 weave and bob through the icebergs, you slow down, you

1 don't use automatic pilot under those situations, and  
2 that's what happened. That's the evidence that was  
3 presented to the grand jury. So, it's the manner that  
4 he did it. It's the little things, like failing to  
5 contact the Coast Guard after even leaving the  
6 northbound lane. They're indicative of his state of  
7 mind at the time and prior to the grounding of the  
8 Exxon Valdez.

9 Finally, it's the leaving of Greg Cousins in  
10 charge and going down below deck. Now, in analyzing  
11 that, you not only have to analyze his affirmative act  
12 of leaving the bridge, but you also have to analyze  
13 what he should have been -- what he could have done if  
14 he had been there and what he had an obligation to do,  
15 which is turn that vessel prior to hitting and  
16 grounding on Bligh Reef.

17 Those are affirmative acts that should have  
18 been taken that can be used in evaluating his  
19 performance in determining whether or not in this great  
20 scope, in the great scheme, whether these acts  
21 constituted recklessness. That's why the indictment  
22 was charged in that manner, and we believe the evidence  
23 that was presented to this grand jury clearly supports  
24 that.

25 Count two, the defendant claims that there was

1 no evidence that the captain was trying to get the ship  
2 off the reef. That was at page 46 of his original  
3 motion. Again, he stated that here in court today.

4 Now, Your Honor, in our notes, I understand  
5 that there are some problems with which grand jury  
6 transcript you are looking at, but in the grand jury  
7 transcript that's in five volumes, at pages 231 and 238  
8 there is talk by Captain Beevers that indicates that he  
9 was trying to get the ship off the reef. And when you  
10 look at the documentation and the evidence that's  
11 presented there, you've got a ship that's grounded upon  
12 a reef, and Mr. Madson says, "Well, the most logical  
13 way to get something off a reef is to go backwards."  
14 Well, when you look at this, Your Honor, and you --  
15 there was evidence about the radar and what radar  
16 systems they had, the ship was pointing in a direction  
17 -- I want to say about 270 degrees, which would be out  
18 toward the zone in the Prince William Sound area where  
19 he should have been, but behind him is nothing but  
20 mountains, there's an island there.

21 Second, it really doesn't make common sense to  
22 go backward when your ship has gone over a rock. And  
23 the reason is, especially in a situation like this  
24 where the ship goes over it and gets stuck on it, you  
25 know that the ship is going to go -- is not going to be

1 able to go backwards. If anything, it's only going to  
2 be going forward, because of the way the rocks lodge  
3 into the bottom of the ship. Regardless of that, when  
4 you look at the bell book and the course recorder, it's  
5 clear that when he came on-board, he continued ahead.  
6 There was a 15-minute break, 20-minute break, and he  
7 started ahead again.

8           The evidence before the grand jury was at some  
9 point Kunkel, the first mate, came up to him and said,  
10 "Look, you're barely stable. You might be able -- we  
11 might be able to get off, but we're not sure." He then  
12 came up approximately 15 minutes later and said, "We  
13 can't go anywhere." And I think it's clear, Your  
14 Honor, and I think -- I don't think an expert needs to  
15 testify that when you take and run a ship full ahead,  
16 squirming back and forth in an angle to turn the ship  
17 in order to try and dislodge it, that's a reasonable  
18 inference that can be drawn from the evidence that was  
19 presented to the grand jury.

20           Now, as to the actual danger, I would refer  
21 the court to page, in our documents, 580, when  
22 Mr. Kunkel was specifically asked, "What kind of  
23 dangers to the personnel on the ship and also to the  
24 areas around you would you perceive dangerous and  
25 damaged?" And his answer was, "I'm not quite sure that

1 you would -- what you would like me to say. The ship  
2 would sink. The fact that it was on a rock, it could  
3 break in half. The -- so much crude oil being released  
4 at once, there was a possibility of explosion, and then  
5 I'm sure every -- well -- one is quite well aware that  
6 the oil was spilled in the water."

7 There was a danger that had that ship become  
8 dislodged, it would have sunk. Greg Cousins told the  
9 captain that at the second time -- or no, Kunkel told  
10 the Captain that the second time he came up. He said,  
11 "If we get off, we'll -- there's a good chance we are  
12 so unstable that we could sink."

13 Now, it doesn't take a rocket scientist to  
14 figure out that if you sink, the whole load of this  
15 tanker is going to go out, causing tremendous damage,  
16 ecological damage to the environment.

17 That's not what happened here, and that really  
18 misses the point also because it's not the actual  
19 damage that could have occurred, but it's the risk of  
20 damage, which I keep coming back to. The statute is  
21 the risk of damage.

22 THE COURT: So, you are arguing that the risk  
23 of damage, an amount exceeding \$100,000.00 to property  
24 of another, would be the risk of additional crude oil  
25 being released because of a possible sinking?

1 (3180)

2 MR. COLE: Capsizing. The mate said that the  
3 ship was unstable to float a second time, meaning that  
4 it would capsize.

5 Now, finally, as to count number three,  
6 Mr. Madson, in a cursory fashion, concludes if there is  
7 insufficient evidence to support either count one or  
8 count two, the indictment must be dismissed. He said  
9 that on page 35 of his motion. He provides no support  
10 either in his motion or in his comments today to  
11 support that particular proposition. Count three was  
12 added as an alternative theory to the grand -- it was  
13 added as an alternative theory if this case -- if and  
14 when this case went to trial.

15 We believe that the jury is entitled to look -  
16 - and if there is sufficient distinction between count  
17 one, the acts of count one and count two, to look at  
18 those actions separately. We also believe that if, in  
19 the absence of that, the jury should also be given the  
20 alternative to look at all these actions in one. So,  
21 that is why the indictment was created in the fashion  
22 that it was.

23 On one hand, we believe the evidence was  
24 sufficient to indicate that what he did before the  
25 Exxon Valdez was grounded constitutes recklessness. We

1 also believe that the actions that he took after the  
2 Exxon Valdez grounded were reckless. In the  
3 alternative, I believe, and there is sufficient support  
4 for this, that under an alterative theory, when you  
5 look at the collective acts, that Mr. Hazelwood,  
6 Captain Hazelwood, took over between the time he became  
7 a captain until after he released his command at about  
8 -- or when he turned the ship off at about 1:40, that  
9 that constitutes reckless conduct.

10 THE COURT: So, let me ask a couple questions.  
11 If the court found it wasn't sufficient evidence for  
12 number one and there wasn't sufficient evidence for  
13 number two, the court could find that the totality of  
14 his actions constituted the element of recklessness and  
15 the risk of amount of \$100,000.00 more, or exceeding  
16 \$100,000.00 to property. Is that what you are saying?

17 MR. COLE: Yes.

18 THE COURT: And isn't that what this case  
19 boils down to, isn't it really just one case, whether  
20 or not what happened, all the actions leading up to the  
21 spill constitute recklessness?

22 MR. COLE: Well, Judge, I suppose that you  
23 could look at it that way. Let me give you an example  
24 of why I don't think that that's necessary.

25 A person goes out and drives when he's

1 intoxicated and causes an accident, hurts somebody, and  
2 leaves the scene. Now, you could analyze that in terms  
3 of saying, well, there's really just one act, it was  
4 this person's reckless driving and everything flowed  
5 from the reckless driving. Not only did he hurt  
6 somebody but then he left. And, therefore, the really  
7 only appropriate charges are manslaughter.

8           Whereas, if -- you can also look at it as two  
9 distinct acts. You could look at it as an assault,  
10 manslaughter and a leaving the scene of the accident.

11           I'll give you another example. A person comes  
12 up to a store owner, points a gun at them, scares them,  
13 and then shoots maybe the skin off their little finger.  
14 Now, that could be in the process of a robbery. And  
15 let's say the state charges him with -- I believe the  
16 state could charge that person with two counts of  
17 assault; assault for threatening a person, placing them  
18 in fear of serious physical injury by means of a  
19 dangerous instrument, or recklessly causing physical  
20 injury by means of a dangerous instrument.

21           Under alternative theory and under the fact  
22 that those are two separate incidents, I believe that  
23 there is sufficient evidence in both of -- there is  
24 sufficient distinction between what occurred before and  
25 after to support a count of recklessness on each case.

1 THE COURT: Mr. Madson.

2 MR. MADSON: Well, I think I can thump on this  
3 terminally ill horse for just another minute or two,  
4 but I suppose I owe Mr. Cole an apology for assuming  
5 that the state was talking about alternative theories  
6 of recklessness. And I made that brash assumption  
7 based on page 22 of the brief, when they say "the  
8 defendant incorrectly assumes in his memorandum that  
9 the state's sole theory of the defendant's recklessness  
10 focuses on his failure to be on the bridge," et cetera,  
11 et cetera.

12 And on page 27, they also use the word  
13 "theory" again. Now, with it mysteriously becomes  
14 "acts." I don't think that's terribly important  
15 whether you use theory or acts. I think it was an  
16 appropriate way of responding to this memorandum when  
17 they say, "This isn't the only thing we say he did."  
18 'Cause that, by itself is not enough.

19 Maybe I'm incorrect. All I'm saying is that  
20 these individual theories have to be separately  
21 supported by sufficient evidence. The court has  
22 already, I think, made the analogy, or else as stated,  
23 that composite of all this is what the court is really  
24 going to look for. Maybe I'm right and maybe the court  
25 is wrong, but in any event, I think, from looking at

1 this, when they talk about individual theories, and  
2 that falls right into Mr. Cole's argument when he said,  
3 "Let's look at a manslaughter."

4 If he's drinking, the man is intoxicated, we  
5 don't have to show in addition to that what specific  
6 acts that he committed which could be deemed reckless;  
7 that's *Luprole* (ph); that's *State vs. Luprole* (ph). I  
8 fully agree with that.

9 Let's take the analogy of that, which compares  
10 to this case, and say what if there is evidence that he  
11 may have had a few drinks, but there are 14 witnesses  
12 that say this man was not intoxicated or even the  
13 slightest bit impaired. Now, that's the situation we  
14 have here. Now, we want to get that drinking in front  
15 of that grand jury. We want to get it in front of the  
16 jury, in spite of all the evidence to the contrary,  
17 that it affected his judgment or anything else.

18 Well, in that analysis, let's say there was  
19 not enough evidence of intoxication, because we've got  
20 all these people saying, hey, he's perfectly fine.  
21 Then I think it's totally appropriate to say to the  
22 state, if it isn't alcohol, if his judgment was so  
23 impaired because he was drunk or under the influence,  
24 then what in the world was reckless when you're  
25 claiming this man committed manslaughter by driving in

1 a reckless manner? What did you do?

2 That's what we asked, and the state responded,  
3 "these things." Well, I can only say, Your Honor, that  
4 whether you look at them individually or look at them  
5 altogether, you've got to look at the causation.  
6 Mr. Cole says also I missed the point on the fact that  
7 it's only the risk of damage rather than the damage  
8 itself. I don't know how anybody could miss that  
9 point.

10 What Captain Hazelwood is allegedly doing that  
11 is reckless is that he is aware of and consciously  
12 disregard a risk, a substantial and unjustifiable risk  
13 that a result will occur. I don't care if you want to  
14 call it an oil spill or the ship hitting the reef,  
15 which causes the oil spill; it's exactly the same  
16 thing. I don't know why we got into that. I mean it's  
17 obvious what the risk was.

18 Lastly, I think I know what the court is  
19 coming to, or at least the direction, I think, the  
20 court is heading, but if not, I think, on count two,  
21 Mr. Cole has argued strenuously that there was a risk  
22 of something occurring, of additional damage occurring  
23 and additional oil spilling on count two. But the  
24 element has to be proven, that this additional amount  
25 is over \$100,000.00. So, I would submit, Your Honor,

1 that under any application of these counts, whether to  
2 look in the elements of recklessness, whether looked at  
3 altogether or separately is simply insufficient.

4 (3788)

5 THE COURT: Well, based on the record I have  
6 before me, the motion is going to be denied on all of  
7 them. I think that the evidence taken alone,  
8 uncontradicted, is by no means is dispositive of the  
9 issue after (indiscernible - unclear) but at this stage  
10 of the proceeding, the evidence taken alone,  
11 uncontradicted in light most favorable to the state  
12 here, in my opinion, would lead to a conviction and  
13 lead to the establishment of the elements of each of  
14 the counts. However, I'm going to order the state to  
15 -- and the defendant to commit briefing on why these  
16 three counts should not be consolidated into one count  
17 for trial purposes.

18 MR. MADSON: It has been somewhat briefed,  
19 Your Honor. Do you want additional briefing on that?

20 THE COURT: Yes, additional briefing on that.  
21 It seems to me that the issue hasn't been addressed  
22 fully and I need another shot at it by both the state  
23 and defendant.

24 You can give that to me by, I think, in  
25 probably a week, concurrently brief the issue before it

1 was answered. I want concurrent briefing on that.

2 MR. MADSON: I'm sorry. I was thinking of  
3 something else. What was the time limit on that, Your  
4 Honor?

5 THE COURT: A week. What other motions remain  
6 besides...

7 MR. MADSON: I'm not going to argue anymore,  
8 Your Honor.

9 THE COURT: So we are all talking about the  
10 same...

11 MR. MADSON: Basically, that was the  
12 multiplicity was the main one, the motion to  
13 consolidate, which was essentially the same thing, I  
14 think that...

15 THE COURT: Did you want to argue that though  
16 at this time?

17 MR. MADSON: No.

18 THE COURT: It didn't seem like you did.

19 MR. MADSON: I did not. I think we really  
20 kind of touched on that here in our argument here.

21 THE COURT: Okay, let's take up the motions  
22 that remain to be resolved without oral argument.  
23 Let's go down so we know which ones still are  
24 presenting. You've withdrawn the discovery motion.  
25 What other motions remain to be resolved?

1 MR. MADSON: The dismissal of the count two  
2 and count one of the information, Your Honor.

3 THE COURT: Okay. I've got that.

4 MR. MADSON: And I think that's...

5 THE COURT: Pre-trial publicity and matters  
6 relating to the grand jurors.

7 MR. MADSON: That's right.

8 THE COURT: The blood alcohol issue. Certain  
9 statements that were made by the defendant.

10 MR. MADSON: Pre-trial publicity prior to the  
11 grand -- at the time of the grand jury. I think that's  
12 one that hasn't been -- or has the court moved on that  
13 one?

14 THE COURT: Pre-trial matters and matters  
15 relating to grand jurors.

16 MR. MADSON: Yeah.

17 THE COURT: And the one you argued yesterday,  
18 in addition to blood alcohol, the statements made by  
19 the defendant,...

20 MR. MADSON: Yes.

21 THE COURT: ...Exhibit 69. And then the  
22 consolidation.

23 MR. MADSON: Yeah, I believe that's correct.

24 THE COURT: In additional briefing on the  
25 consolidation, Mr. Cole and Mr. Adams, I'd like to have

1 you present, if the court were to order a consolidated  
2 count, the consolidated count that you would be relying  
3 on.

4 MR. COLE: Yes, Your Honor.

5 MR. ADAMS: Excuse me, Your Honor. With  
6 respect to the motion for consolidation, in the  
7 original brief that Mr. Madson presented, it was  
8 addressed as a motion to consolidate, counts one and  
9 two into essentially a count three, and then when the  
10 supplemental memorandum was filed, there was a motion  
11 to dismiss count three. So, it's kind of in the  
12 alternative.

13 THE COURT: I understand. That's one of the  
14 reasons I need additional briefing. I'm not sure we're  
15 all on the same wave length. It seems to me the  
16 consolidation makes sense, but if there is some very  
17 good, legitimate legal reason why it shouldn't become  
18 consolidated, where there will be distinct prejudice to  
19 the state, then we ought to reconsider it. But, my  
20 opinion, so far, is that we're talking about one  
21 transaction here for which the defendant if found  
22 guilty would be sentenced but one time.

23 That's my common sense approach, but sometimes  
24 common sense and the law differ.

25 Do we need anything else today?

1 MR. MADSON: Your Honor, I think the main one  
2 we need to have a ruling on, of course, is the blood  
3 alcohol issue, because that could affect the -- have a  
4 highly substantial affect on what happens to other  
5 ones. I guess I'm just inquiring whether the court's  
6 going to issue a written opinion on that?

7 THE COURT: I am working on that now. You  
8 presented -- I think you both presented some novel  
9 issues on that and I'm looking for additional cases  
10 from both of you. I think I indicated to Mr. Linton  
11 and we're doing some research on it, too. It's a very  
12 interesting issue.

13 I'll try to get a written decision on all of  
14 these either in the form of an order, and in the case  
15 of the blood alcohol, I may give you a memorandum  
16 decision in order. I'm not sure of that yet, but I'll  
17 try to get a written order out on all the motions that  
18 have been argued except for the motion to consolidate.

19 I'll give you an additional week, which will  
20 be a week from today, to get those briefs in to me, and  
21 I'll give you a decision on that as soon as I can  
22 afterwards.

23 MR. MADSON: I just want to make sure that  
24 we're through, as far as being in court, and we're free  
25 to go our separate ways. We don't have to come back

1 tomorrow or any other time?

2 THE COURT: If you are not asking for  
3 additional argument on any of these motions, and since  
4 they are your motions -- now, are there any other  
5 motions that are in the works? I heard somewhere that  
6 Mr. Friedman or somebody -- one of the people in your  
7 office filed some additional motions yesterday. Is  
8 that accurate?

9 MR. MADSON: Not to my knowledge, Your Honor.

10 THE COURT: Okay.

11 MR. MADSON: I don't know where that would  
12 have come from. It certainly didn't come out of my  
13 office with regard to this case. I thought I exhausted  
14 my supply, my creativity is at an all-time low as a  
15 result of this case. Who knows?

16 THE COURT: I think it's at an all-time high.

17 MR. MADSON: Well, there may be -- something  
18 else might happen. We'll have to wait and see. I  
19 guess I'm in the same situation as the state by saying  
20 let's wait and see.

21 THE COURT: Okay. But there are no other  
22 motions pending or have been filed up to the present  
23 date that you are aware of?

24 (Tape: C-3530)

25 (0037)

1 MR. MADSON: Not even in rough draft.

2 THE COURT: Okay. Then it sounds like to me,  
3 in the absence of something occurring on these motions,  
4 that the integrity of the trial dates...

5 MR. MADSON: The only thing that might alter  
6 that, Your Honor, is the motion for stay, because  
7 Mr. Friedman is now working on the petition for review.

8 THE COURT: Of course.

9 MR. MADSON: I would anticipate doing the  
10 same, depending on -- at least what the court might  
11 rule on in the future.

12 THE COURT: Okay. I think that concludes oral  
13 argument on this, and we'll stand in recess, subject to  
14 further notice.

15 THE CLERK: Please rise. This court stands in  
16 recess, subject to call.
