<sup>a</sup> When data were available for more than one year, figures shown are those for "representative year" (if designated).

<sup>b</sup> No representative year designated.

<sup>c</sup> Data presented represent "Allakaket/Alatna."

<sup>d</sup> In cases where original data did not include household participation figures for the categories shown in this table but include figures for subcategories, the largest figure in a subcategory was used to show household participation.

<sup>e</sup> ND = no data available.

<sup>f</sup> A dash indicates no data presented, which could mean that they were not applicable but zero, or not collected; "0" indicates that zero was reported.
