

CH2MHILL PERSONAL COMMUNICATION FORM

Information From: John Ennis/ExxonMobil

Date: February 24, 2003

Information For: Point Thomson EIS Team

Time: 1:00 to 5:00 p.m.

Means of Communication: Point Thomson EIS Project Requests for Information Meeting

Subject: RFI 61 – Additional Dredging Needs

Physical Resources: Ocean Disposal and Dredging

RFI 61 – Additional Dredging Needs

Information Needed: Why do we need the additional two feet of dredging? Why not dredge further south and use just a 50 ft. dock off shore? (verbal request)

Level of Detail: Request for verbal information on the criteria that drove the changes – what were the reasons for the changes in each instance?

Response: John Ennis said the additional 2 feet of dredging ensures that the target depth is maintained following initial dredging. ExxonMobil proposed over-dredging to reduce the need for maintenance dredging.

Status: Closed.
