

# CH2MHILL PERSONAL COMMUNICATION FORM

**Information From:** John Ennis/ExxonMobil

**Date:** February 24, 2003

**Information For:** Point Thomson EIS Team

**Time:** 1:00 to 5:00 p.m.

**Means of Communication:** Point Thomson EIS Project Requests for Information Meeting

**Subject:** RFI 62 – Use of Dredge Spoils

**Physical Resources:** Ocean Disposal and Dredging

**RFI 62 – Use of Dredge Spoils**

**Information Needed:** How do we plan to use the dredge spoil and where? Since we are proposing to use the spoil as beach buildup we must have new data showing that the spoil is better quality building material than previously thought? What new data were used? (verbal request)

**Level of Detail:** Request for verbal information on the criteria that drove the changes – what were the reasons for the changes in each instance?

**Response:** Dredge material characterization, completed in mid May 2003, will indicate whether the dredge spoils are suitable for beach nourishment. Preliminary information will be available in early April.

**Status:** Closed. Additional dredging and disposal details will be included as part of RFI #46.
