Subject: Clarification of Construction Schedule (RFI No. 90)
ExxonMobil Development Company
Point Thomson Gas Cycling Project

Dear Mr. Rockwell:

ExxonMobil Development Company (ExxonMobil) is pleased to provide further explanation to the anticipated construction schedule and associated activities. The attached information is being provided to the EPA and the EIS Contractor (CH2M Hill) in support of the proposed Point Thomson Gas Cycling Project.

In addition to the attached hardcopy, an electronic copy has been provided to CH2M Hill. ExxonMobil developed this transmittal to satisfy RFI No. 90 as presented by CH2M Hill in the EISrfiTracking database.

Sincerely,

Larry D. Harms
Regulatory Manager

Point Thomson Gas Cycling Project
Response to EIS Data Information Needs
Clarification to Timing of Construction Activity -EIS RFI 90

The EIS Team raised the following question:

With reference to the information presented in the Point Thomson Project Description, Revision B:

Confirm that minor construction activities may begin in November 2004 (per the personnel table in the Airstrip Needs RFI response) but the bulk of the construction would begin in 2005 (per the Transportation and Logistics RFI response).

Answer:

The ExxonMobil engineering team has evaluated the requirements for the execution of the Point Thomson Gas Cycling project. This Construction Plan is presented in Section 10 of the Project Description, Revision B. Per this plan, construction of the ice road and some of the infrastructure could begin late in 2004. The bulk of the construction activities will begin in 2005.
